#### VIEWPOINT

#### By ASA Trustee Tim Smith, Giddings, TX

We continue to enjoy exciting times with SimGenetics and the American Simmental Association as we position ourselves in the industry to gain more and more of the cattle market share. I have just completed my first three-year term on the ASA Board of Trustees and consider it a true honor to have been reelected to serve an additional three years — thank you for this opportunity. A

major goal for the board during my tenure has been to strengthen communication with members and their customers. When I wrote my first Viewpoint, a couple of years ago, I decided to share a few facts and highlights that I found positive surrounding SimGenetics. The idea was well received, so again this year I thought I should do the same instead of sharing my personal philosophy!

#### DID YOU KNOW . . .

- In 2015, our registrations increased over 15% from the previous year. In 2014, we registered 62,424 animals and in 2015 we registered 71,816 animals. Purebred registrations made up 39% of the 2015 registrations and of the animals registered 60% were heifers.
- The most recent Domestic Semen Sales report from the NAAB is for year 2014 and it indicates that Simmental is the second largest breed for amount of semen sold and that Simmental's percentage of semen sold within the beef industry has increased. For more information concerning numbers and other breed rankings visit the NAAB website.
- "Profit Through Data" is a blog that is easily accessed through the website that was created with the intent of providing information on data submission and tools available through Herdbook services and much more. Several new breeders have commented that this blog really helped by making them more aware of herd management options and educating them on items such as common DNA errors. Check it out and contribute ideas for topics to staff spearheads, Jannine Story and Emme Troendle, or any staff member — they all contribute!
- The most recent evaluation of Average EPDs on purebred Simmental indicates that our breeds average \$API and \$TI continue to increase. It is interesting to see that EPDs for marbling and ribeye increase while EPDs for backfat decrease. Carcass merit is another reason why we will continue to gain more market demand in the commercial industry!
- The Association now collects almost 120,000 records on animals each year from Simmental members and other breed producers.
- "Have You Herd" is another blog available to our membership that it is spearheaded by staff member Leoma Wells. The intent of the blog is to inform our members about the most recent information concerning DNA and genetic testing plus THE in addition to other topics. You can access this blog from the ASA homepage.
- THE (Total Herd Enrollment) numbers enrolled for 2015 surpassed 97,000 females with more than 1,873 herds participating. We are hoping to exceed 100,000 females on inventory in 2016, so we are encouraging the membership to participate in this program to insure the continued growth of the ASA genetic data base. Remember the first transfer on each animal recorded is free!

- The circulation of the ASA *Simtalk* publication is approaching 50,000 mailed copies. Every new buyer of a SimGenetics animal that has a paper transferred to their name automatically goes on the mailing list and that is why the largest portion of the circulation goes to commercial buyers. Just one more reason we encourage you to transfer every animal you sell. If you are looking for more bang for your buck in advertising, this is a great place to promote your product and upcoming sales!
- Transfers in 2015 totaled over 25,000 and of those transferred over 12,000 were bulls; 83% of the bull transfers went to "non-member buyers" which indicates valued bull sales and SimGenetics growth in the commercial industry.
- American Simmental Association has a new address, One Genetics Way, Bozeman, Montana 59718. The new building is complete and staff has moved in! The board decided to host the Fall Focus Open Forum Board Meeting in Bozeman, Montana, August 19-23, 2016, to encourage participation and also to have an Open House for the membership to tour the new office everyone is invited!
- ASA possesses the largest multi breed database in the world with 16.3 million combined records including the Simbrah Breed and our IGS Partners.
- The "ASA Science Blog" is another great communication tool. This blog is spearheaded by ASA staff member, Jackie Atkins, PhD. The blog focuses on three main topics: DNA Testing, Genetic Conditions, and Genetic Evaluations. This interactive blog has new post bi-weekly and it allows you to post your thoughts and/or ask questions. What a great way to stay current on new genetic happenings! You can access this blog from the ASA web site.
- The ASA Carcass Merit Program (CMP) is the largest and longest running (since 1997) sire evaluation program in the world with data collection performed on over 11,000 carcasses. This year we are proud to announce that all calves in the program will also have "Feed Intake" data collected that will be added to the ASA Genetic Data Base.
- "tREG" is a blog spearheaded by *Register* staff members. This blog is an extension of info published in *the Register* but it also serves to introduce people involved in SimGenetics. The blog serves the purpose of introducing new staff, breed representatives, and covers featured breeders and SimGenetics enthusiasts. This blog also keeps you up to date on happenings and new industry events while keeping you abreast of the most recent science available to Sim-Genetics. You can access this blog from the ASA web site.
- Communication is important to each of your Board of Trustees! The Board of Trustees contact information is listed in the front of each *Register* and *SimTalk* Publication, in addition to the ASA web site. Please feel free to contact us, we welcome your input and suggestions!

This information just touches on a few of the progressive and positive happenings with SimGenetics that keeps me excited and committed to our association and breeds of cattle. We have access to the science, data and tools needed to ensure our continued growth of SimGenetics and their growth within the beef cattle market share!

Donor cow Matriarch Rockin Robin with her natural calf.

The Lee family: Zach, Jerry, Kaitlyn and Barb.

A Missouri couple has enjoyed a durable, long-lasting affiliation with Simmental cattle.

> uncle," she continued. "My parents have passed away but my brother, Mike Engelbrecht, continues to run the family farm. Mike's two children are also enthusiastic about Simmental and show in 4-H. He maintains a small registered herd and Jerry and I run some of our heifers down there with his cattle."

Jerry was born and raised in Columbia, where Lee Simmental Farms is located. "My dad was in the construction business, but started our farm in the '70s with the traditional spotted Simmentals just like everybody else back then," he said. "We had no experience with other breeds before that; we've had only Simmentals. We've been loyal to Simmental all along and the breed has been very good to us."

Simmental cattle have played a prominent role in the lives of Jerry and Barb Lee ever since the 1970s when both of their families established Simmental cowherds. Both were raised around the breed and have been enamored with them ever since. "We even met at a cattle show where we were both showing Simmentals," Barbara explained.

"I was raised on a small farm at Hermann, Missouri, about 80 miles west of St. Louis. My dad started with Angus, but he switched to Simmental after my brother and I started showing Simmental-Angus crosses that we obtained from my dad's Early on, Jerry was heavily involved in the family construction business, working with the cattle in the evenings and on weekends whenever he could find time. "Now, I'm a full-time cattleman, I don't work construction any more," he says.

"Our first Simmentals got too big on us. Then, we used Red Angus bulls on our females to produce F1s and to bring their size down. When the market began to call for black-hided animals, we got rid of the F1s. From there, we went to purebred Simmentals, breeding up from an

Lee Farms won the prestigious 2016 Pen of Five Bulls competition in Denver.

Angus base," he recalled. "We actually went through a SimAngus<sup>™</sup> phase before there was a conscious effort to do that."

The Lee cowherd currently numbers 200 registered females, predominantly purebred with a few SimAngus. "We moved to black-hided cattle in the early 1990s, and continue to use Angus bulls on purebred Simmental females to meet the demand for halfblood bulls," he continued. "Our commercial buyers really like the 50-50 crosses and with our herd composition we can oblige them very easily."

Tommy and Karen Lee, Jerry's parents, maintain a commercial Simmental-cross herd that is closely intertwined with Jerry and Barbara's registered animals. "We use quite a few of their cows as recipients in our embryo transfer program and they utilize our genetics for breeding purposes," Barb says.

Their breeding program is heavily dependent on embryo transfer and artificial insemination. "We have 6 to 10 donors that we flush up to three times a year before breeding them back to get a natural calf out of them," Jerry reported. "We generate 100 to 200 embryos annually and place them in my dad's herd along with other cooperator herds. We also market some eggs private treaty and through the SimMagic Sale in Denver each year."

Jerry handles his own AIing with Barb's assistance. They synchronize and breed their donors and line up the recipients so that when embryologist Stan Huels arrives, he can flush and place the embryos as needed. "Stan is based in Illinois, but makes a circuit through this area every couple of weeks, so his schedule meshes with ours very conveniently," he said.

Breeding emphasis has put calving ease first and foremost. "Our focus on that trait dates back to the early days of the breed in North America when we had calving issues. We know that Simmental don't have those problems any more, even though some of these commercial guys seem to think that we do," he stated. "We realize that one poor-calving bull could seriously jeopardize our business, so we really stay after that trait. Of course, we also concentrate on soundness, depth and growth. We shoot for 6.0 to 6.5 frame cattle with performance."

Their genetics are currently marketed through three separate sales. "This year, we scheduled an open heifer sale in November, a bred heifer sale in December and our bull sale in March," Barb reports.

"For the past 4-5 years, we've been selling everything on-line through Breeder's World, a sales service firm headquartered in Bellevue, Ohio," she continued. "This method works very well, and has it has been well received."

The Lees have hosted an open house before the open heifer sale so potential buyers could view the sale offerings in advance and have any questions answered. "Many of our customers are repeat buyers and they help spread the word to other breeders," he says.

She explained how the on-line sale works. "Bidders pre-register with Breeder's World and receive a buyer's number. Buyers, through their computers or phones, start bidding on all sale animals at the same time and bidding continues until a pre-set deadline," she said. "It could be from 11:00 a.m. to 7:00p.m., for instance. Breeder's World oversees the entire bidding process and communicates primarily by email. Following the close of bidding, the company then handles all transactions, sending us a updated sale summary throughout the process."

From that point, Jerry arranges transportation for delivery of all sold lots. "We've sent cattle to dozens of states, from Texas to West Virginia, from Oregon to Minnesota," he said.

"We are in the process of building our own sale facility on the farm, aiming eventually toward live cattle sales. One of the drawbacks with on-line sales is that you are limited in the number of animals you can sell without losing buyer interest. We generally sell 20-25 head through on-line sales. With production sales, we can sell more cattle," he added. "We'll also be able to help our seedstock customers sell their genetics by inviting them to consign to our on-farm sales."

(Continued on page 12)

# A Loyal Link to Simmenta

"We are in the process of building our own sale facility on the farm, aiming eventually toward live cattle sales."

(Continued from page 11)

Grazing land in the Columbia area is difficult to find, leading to leasing of parcels that may be as far apart as 30 miles, necessitating considerable transport of cattle. The Lees home place consists of 100 acres, and the entire herd is brought home for the winter. Calving is geared to start in January and end in April. "We don't do much farming, except hay and some limited corn. We grind the corn for feed," he says.

"We also sell some show animals and do a little showing ourselves," he commented. "We go to the North American in Louisville and to the National Western in Denver every year. We won the Denver pen of five purebred bulls competition this past January. We show primarily for the exposure and the contacts we make."

Among their proudest accomplishments are two prized bulls: LLSF Pays to Believe and LLSF Uprising. Both animals are being heavily used in A.I., and their semen and embryos have topped several sales.

LLSF Pays to Believe.

Barbara works off the farm for Shelter Insurance Companies, based in Columbia. In addition, she has responsibility for all records, registrations, sale footnotes and advertising.

They're the parents of two grown children. Kaitlyn, 23, graduated from the University of Missouri (MU) with a degree in Biochemistry and is presently working on her Ph.D. in Pharmacy. Zach, 20, works for a large grain farmer while taking classes from Mobley junior college, Mexico branch. He intends to transfer to MU with the intention of earning a degree in Ag Management.

"We've enjoyed the on-going relationship we've had with Simmental," Jerry summarized. "We have always focused on those calving ease numbers while also emphasizing enough growth to pump up our customer's weaning weights."

# We HAVE to Cull Genetic Defect Cattle?

By Jared E. Decker, Ph. D. assistant professor and state beef genetics extension specialist at the University of Missouri.

Editor's note: This article was originally published February 22, 2016, by BEEF® magazine (beefmagazine.com) and reprinted with permission.

Several years ago, I authored an article for BEEF Cow-Calf Weekly that spelled out my perspective on how the beef industry should manage genetic defects rather than immediately eliminate all carriers. One could assume that is simply the opinion of an academic. However, there are data to back up the view that harsh approaches to eliminate genetic defects have a negative impact on the beef industry.

First, I recount an unfortunate event. In 2015, W/C WIDE TRACK 694Y was identified as a carrier of Contractural Arachnodactyly (CA), a.k.a. Fawn calf. This bull was tested as part of regular surveillance of commonly used artificial insemination (AI) bulls in the Simmental breed.

Later it was discovered that the positive test result was false. Before this test result could be fixed and the bull correctly identified as CA-free, the bull was euthanized.

I hesitate to recount this story, because I don't want to rub salt in the wounds of the bull's breeders. However, this story powerfully illustrates the extreme stigma of genetic defects within the beef industry. The breeders did not want to be known as the propagators of CA within the Simmental breed.

We need to recognize that genetic defects are a known unknown; we know all animals carry broken genes, but it is unknown which broken genes will rise to high enough frequency in a breed to

0.6 0.5 Marbling EPD 0.4 0.3

Figure 1. Genetic trend for marbling in the American Angus Association. Blue dashed line is regression of marbling on year, accounting for correlation in time; blue dotted lines represent 95% confidence intervals.

cause pregnancy loss or produce affected calves with an observed defect and thus require management. It is also difficult to know which rare, low-frequency DNA variants are neutral and which variants have severe negative effects. To be clear, we needed to stop holding breeders accountable for biological processes that are out of their control.

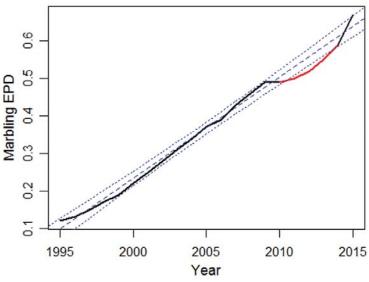

Second, consider Figure 1 graphing the genetic trend of marbling within the Angus breed. From 1995 to 2008, the marbling EPD increased by 0.03 marbling score units per year. In 2008, the trend makes a dog leg, and the three-year period from 2011 to 2013 plotted in red is significantly different from the predicted trend. Was that in part because of attitudes toward managing genetic defects? Perhaps, with more sensible approaches, perhaps the genetic trend would have continued to increase at the historic rate.

I applaud the American Simmental Association for removing the color system from their TraitTrac carrier status reports and the American Angus Association for modifying rules regarding DD registrations. However, to be completely honest, I fear this period of cattle history reflects a habit of trusting opinion and our gut rather than relying on data and better practices.

In order to compete with other protein sources, beef producers need to adopt new technologies and optimal practices. We need to wean ourselves from our "addiction" to actual performance data, with actual birth weights being the biggest offender. Instead, we need to focus on the economically relevant EPDs, such as calving ease direct.

We need to stop using informal selection criteria and independent culling levels. Instead, we need to use the more rigorous economic selection indexes. We need to stop double counting data, such as using actual birth weight, birth weight EPD, and calving ease EPD when selecting heifer bulls. Instead, if we want to make more reliable and precise selection decisions, we need to buy bulls and select heifers with genomic-enhanced EPDs and genomic predictions. In fact, the increased genetic trend for marbling from 2014 to 2015 in Angus may be due to the benefits of genomic-enhanced EPDs.

Genetic defects, whether dwarfism in the 1960s or the collection discovered in the last 10 years, have always had a negative impact on the industry. Some problems are simply a consequence of biology. But what can change are our attitudes, approaches, and practices. We can more fully embrace science and technology, leading to profitable and sustainable beef production for our children and grandchildren.

# The Ultimate Gift

ASA employees share more than their friendship.

#### By Dan Rieder

ver a 10-year period, American Simmental Association staff member Nancy Chesterfield, had experienced a slow, but steady decline in kidney function. "I was diagnosed with thin basement membrane disease (TBMD) and knew that eventually I was going to need a new kidney or be put on dialysis," she said.

TBMD is described medically as "an inherited disorder that mainly affects the glomeruli, tiny tufts of capillaries or small blood vessels in the kidneys that filter wastes from the blood." It is a rare disorder that has been diagnosed in less than 1% of the population.

During a casual conversation in the ASA office lunchroom, Kathy Shafer, who has shared an open office space with Chesterfield for several years, heard something that piqued her interest. "That was seven or eight years ago, and I prodded Nancy for more information. When I heard what she was going through the words 'you can have one of mine' just kind of popped out of my mouth," she recalled.

"I was absolutely overwhelmed," Chesterfield exclaimed. "I had already checked with my siblings and none of them was a match. After the necessary blood work and tests were performed, Kathy came up a perfect match."

On the advice of her doctor, Chesterfield visited the University of Minnesota Hospital, widely acclaimed and ranked as number one in the world for kidney transplants. On December 15, just a few weeks before she would have been required to go on dialysis, the two women went to the hospital together accompanied by their spouses, Mick, a retired Montana Game Warden and Wade, ASA's Executive Vice President.

"Even then, I asked her 'are you sure you want to do this'?" Nancy said. Kathy's answer: "absolutely!" reaffirmed that she had no intention of backing out.

Kathy, as the donor, went into the operating room first. "The best way to perform a transplant is directly from the donor to the recipient as quickly as possible," Kathy said. "They did not remove my organ until Nancy had been fully prepared to receive it. When she was ready, doctors promptly removed my kidney and inserted it in her. Because it was so quick, there was no chance for tissue deterioration."

When she recovered from the anesthesia, Chesterfield, 62, felt immediate relief. "I could feel the kidney working, because I'd had such a fluid buildup. After six days in the hospital, I checked in with the doctors every day for two weeks and have gradually tapered off those visits to twice a week to once a week to once a month. I will take two anti-rejection pills every day for the rest of my life." Shafer, who is 53, volunteered that her age is ideal for transplant donors. "I learned that if I were to have kidney disease, it would have most likely shown up by now," she said. (Continued on page 18)

Chesterfield, after recovering from the anesthesia.

Shafer, hours after the surgery.

# The Ultimate Gift

#### (Continued from page 17)

According to the National Kidney Foundation, there are currently 121,678 people in the US who are waiting for life-saving organ transplants. Of those, 100,791 are awaiting kidneys. The median wait for a kidney is 3.6 years. In 2014, 17,107 kidney transplants took place in the US, with 11,570 of the kidneys coming from deceased donors (traffic accidents, heart attacks, etc.), with 5,537 originating from living donors. Shockingly, 13 people die each day while waiting for a kidney.

"I'd like to encourage people to learn about the urgent need for kidneys and how they might go about donating. There are very few risks associated with living with one kidney and by donating, a person experiences a great rush of satisfying purpose," Shafer concluded. "There is a massive, national data base available to match donors with recipients and donated kidneys can be kept for future use. The missing component is a lack of willing donors."

As for Chesterfield, she has a new lease on life. "I feel like a new person. Before the surgery, I was always tired — I could have easily taken a nap at my desk. Now my energy level is amazing and I don't get tired at all. I can't be any more grateful to Kathy — she gave me a part of her own body and saved my life," she smiled.

### VOLUNTEERS ASA Staff a Giving Group

#### Countless hours and unselfish dedication to worthy causes.

#### Coordinated by Emme Troendle

Although none of their efforts rise to the level of Kathy Shafer's unsurpassed compassion and generosity, several other ASA employees are also deeply involved in community causes.

Dan Rieder, Cynthia Conner, Jim Largess and Rebecca Price have donated blood through the American Red Cross over several decades, combining for well over 300 pints. Leoma Wells, Jannine Story, and Marilyn Roth have donated their time to help organize and conduct Special Olympics programs.

Many newer members of the staff have stepped up to meet the needs of the homeless and hungry members of the Bozeman community. Callie Griffin volunteers for the Food Bank, while Alicia Clements donates her time at Community Café - a local soup kitchen, and Carla Stephens gives of her time to Family Promise — a shelter for families in need.

Over the years, staff members have collectively supported the United Way with payroll-deduction contributions of more than \$100,000.

For many years, the staff has enthusiastically supported a variety of worthwhile causes with their time and money during the holiday season, giving more than \$10,000 collectively to such organizations as Wounded Warriors and Quiet Waters, the Food Bank and the Bozeman Cancer Support Group through a fun-filled auction of donated items.

In addition, one other member of the Simmental family made a similar and significant organ donation. Paula Miller, wife of ASA Board Chairman Dale Miller, donated a kidney to a family friend four years ago.

"Our staff has a long history of community involvement ever since the Association was founded here in 1969," says CEO Wade Shafer, himself a mentor to an under-privileged, single-parent boy for more than 10 years through the Big Brothers and Big Sisters program. "Not only have they given of their time and talent, but they have reached deep into their own pockets to help those who are less fortunate."

Extended-Release Injectable Parasiticide Sterile Solution NADA 141-327. Approved by FDA for subcutaneous injection For the Treatment and Control of Internal and External Parasites of Cattle on Pasture with Persistent Effectives CAUTION: Federal law restricts this drug to use by or on the order of a licensed veterinaria INDICATIONS FOR USE LONGRANGE, when administered at the recommended dose volume of 1 mL per 110 lb (50 kg) body weight, is effective in the treatment and control of 20 species and stages of internal and external parasites of cattle: Gastrointestinal Roundworms Lungworms Bunostomum phlebotomum – Adults and L<sub>4</sub> – Adults Cooperia oncophora - Adults and L Cooperia punctata - Adults and L Cooperia surnabada - Adults and L Haemonchus placei – Adults Grubs Hypoderma bovi Oesophagostomum radiatum - Adults Ostertagia lyrata – Adults Ostertagia ostertagi – Adults, L<sub>a</sub>, and inhibited L. Lungworms

Ostertagia ostertagi Trichostrongylus axei

DOSAGE AND ADMINISTRATION

LONGRANGE® (eprinomectin) should be given only by subcutaneou injection in front of the shoulder at the recommended dosage lev eprinomectin per kg body weight (1 mL per 110 lb body weight). ed dosage level of 1 mg WARNINGS AND PRECAUTIONS

120 days

100 days

150 days

#### NINGS AND PRECAUTORS Withdrawal Periods and Residue Warnings Animals intended for human consumption must not be slaughtered

within 48 days of the last treatment.

This drug product is not approved for use in female dairy cattle 20 months of age or older, including dry dairy cows. Use in these cattle may cause drug residues in milk and/or in calves born to these cows.

A withdrawal period has not been established for pre-ruminating

#### calves. Do not use in calves to be processed for ve

Animal Safety Warnings and Precautions The product is likely to cause tissue damage at the site of injection, including possible granulomas and necrosis. These reactions have disappeared without treatment. Local tissue reaction may result in trim loss of edible tissue at slaughter

Sougheet. Observe cattle for injection site reactions. If injection site reactions are suspected, consult your veterinarian. This product is not for intravenous or intramuscular use. Protect product from light. LONGRANGE® (eprinomectin) has been developed specifically for use in cattle only. This product should not be used in other animal species.

#### When to Treat Cattle with Grubs

LDNGRANGE effectively controls all stages of cattle grubs. However, proper timing of treatment is important. For the most effective results, cattle should be treated as soon as nossible after the end of the heel fly (warble fly) season **Environmental Hazards** 

Not for use in cattle managed in feedlots or under intensive rotational grazing because the environmental impact has not been evaluated for these scenario: Other Warnings: Underdosing and/or subtherapeutic concentrations of extended-release anthelmintic products may encourage the development of parasite resistance. It is recommended that parasite resistance be monitored

following the use of any anthelmintic with the use of a fecal egg count reduction test program

#### TARGET ANIMAL SAFETY

Clinical studies have demonstrated the wide margin of safety of LONGRANGE® (eprinomectin). Overdosing at 3 to 5 times the recommended dose resulted in a statistically significant reduction in average weight gain when compared to the group tested at label dose. Treatment-related lesions observed in most cattle administered the product included swelling, hyperemia, or necrosis in the subcutaneous tissue of the skin. The administration of LDNGRANGE at 3 times the recommended therapeutic dose had no adverse reproductive effects on beef cows at all stages of preeding or pregnancy or on their calves. Not for use in bulls, as reproductive safety testing has not been conducted in males intended for breeding or actively breeding. Not for use in calves less than 3 months of age because safety testing has not been conducted in calves less than 3 months of age.

#### STORAGE

Store at 77° F (25° C) with excursions between 59° and 86° F (15° and 30° C). Protect from light.

Made in Canada. Manufactured for Merial Limited, Duluth, GA, USA. "LONGRANGE and the Cattle Head Logo are registered trademarks of Merial. ©2013 Merial. All rights reserved. 1050-2889-02. Rev. 05/2012

# season-long parasite control • 15,000 Head • 9 STATES +28 POUNDS AVERAGE

Looks like our secret is out.

#### LONGRANGE averaged 0.28 lbs./day more

## Thanks to LONGRANGE<sup>®</sup> (eprinomectin), parasite control will never be the same.

Comparing more than 15,000 head in nine states, stockers treated for parasites with LONGRANGE gained an average of **28 lbs. more** over DECTOMAX<sup>\*</sup> (doramectin), CYDECTIN<sup>\*</sup> (moxidectin), SAFE-GUARD<sup>\*</sup> (fenbendazole) and ivermectin-treated cattle – even when used in combination over 103 days.<sup>1</sup> And at today's market prices, that adds up to an extra \$56 per head. Not bad for around a \$5 investment.

If you want results like this, talk to your veterinarian about LONGRANGE or visit theLONGRANGElook.com.

Watch for a chance to win a JOHN DEERE<sup>®</sup> GATOR Scan to watch video and enter, or go to theLONGRANGElook.com/sto9.

**IMPORTANT SAFETY INFORMATION:** Do not treat within 48 days of slaughter. Not for use in female dairy cattle 20 months of age or older, including dry dairy cows, or in veal calves. Post-injection site damage (e.g., granulomas, necrosis) can occur. These reactions have disappeared without treatment.

# Denim and Diamonds In Des Noines The Place to be Seen in 2016

By Emme Troendle, with Classic Coordinators Tammy Heaton and Gina Long

This summer the American Simmental Association's 36th Annual National Classic, dating back to 1981, will return to the Iowa State Fairgrounds in Des Moines for the third time. The Iowa Simmental Associations (ISA) also hosted the National event in 1989 and 2010. In addition, the ISA hosted the North Central Regional Classic in Des Moines in 1992 and 1995, in Mason City in 2003, and in Spencer in 2008.

The planning committee, headed by returning Coordinators Tammy (Reck) Heaton and Gina Long, in conjunction with the Iowa Junior Simmental Association (IJSA), chose the theme: "Denim and Diamonds in Des Moines, the place to be seen in 2016".

#### **Tammy Heaton, Event Coordinator:**

#### This isn't Her First Rodeo

The last time that the National Classic was in Des Moines, Tammy Heaton served as the National Classic Coordinator. Since 2011, Heaton has served on the Iowa Simmental Association (ISA) Board, including a term as president.

Raised in a Simmental family (Reck Brothers N Sons, of Albia), Tammy and her husband, Mike, and their 14-year-old son, Tyler, currently reside in Monroe. As a youth, she had competed in AJSA activities, and has continued to stay connected to the program through Tyler, her nephews and a niece. She works at DuPont Pioneer as a Quality Manager in Johnston, Iowa.

Reflecting on the 2010 National Classic, Tammy said, "It was a fantastic experience not only due to the all the juniors, but also because of a great committee that I served with as well as the wonderful Iowa Simmental supporters and businesses that volunteered and contributed to the event. As the idea of hosting another National came about I was honored to be able to volunteer to help with the organization of it. Of course, nothing of this magnitude is possible without a strong Iowa Junior and Senior organization and I am blessed to have all of these individuals pitching in to prepare for our summer visitors. With the help of individuals such as these anything is possible."

#### Gina Long, Event Coordinator:

In 2010, Gina Long helped organize a variety of tasks, from preparing the facilities, registrations, photography contests and awards, to public speaking, team fitting, and so much more.

Long lives in Creston, Iowa, with her husband and three kids, Tyler, Cody and Sammi. She is a Business and IT instructor at Southwestern Community College. A part of a Simmental family since childhood, Long assists with the family operation, Long Simmentals, consisting of 100 purebred Simmental cattle and 600 acres of crop, pasture and hay ground.

This year, Long contributes to the National Classic as an Event Coordinator. She has been involved with AJSA and IJSA and attended numerous Regional and National Classics, and AJSA activities during her youth. Today, Long continued her involvement and support of junior programs while her children compete on the local, state and national levels.

In planning and preparing for the upcoming National Classic, Long said, "Our entire committee and Iowa membership hope to make this a great and memorable event for everyone involved. We hope to see you all in Des Moines!"

#### **Committee Members:**

Similar to the last time that the National Classic was in Des Moines, most committee members have accepted more than one job to tackle the tasks. "We have great people in Iowa that step up and help out with all of the events," said Heaton, referring to the team that was assembled this year. "We are fortunate to have Nancy Jass and Marshall Ruble, as well as Junior Advisors — Morgan Wadsworth, Kellie Carolan, and David and Marketta Haines, plus countless additional volunteers to help with meals, hospitality, novice competition and the other activities."

#### **Fundraising:**

"Our major fundraiser for the National classic is the *Herd in a Tank* promotion," Explained Heaton. "The Iowa Junior Simmental Association is selling 600 tickets at \$100 each for the drawing on June 5th, at the Junior Field Day in Ames, IA. Twenty Simmental breeders (and counting) are donating embryos, straws of semen, and even a tank for the fundraiser. The donations for this event along with donations from other businesses and breeders will help make this National Classic a success"

#### **Facilities:**

Iowa State Fairgrounds will be utilized to accommodate the contests and exhibitions. The facilities are equipped to hold thousands of head of cattle including designated tie outs — all of which are located a short distance from the Holiday Inn Downtown, which will serve as the headquarters for the event. This year all competitions and events will be held on the fairgrounds in close proximity of the cattle

#### **Hotel information:**

The headquarters hotel is the Holiday Inn, located 10 minutes from the fairgrounds with overflow at the EconoLodge, right next to the fairgrounds.

Camping is being offered on the fairgrounds with amenities for campers. The amenities include hundreds of camping sites with water, sewer and electrical hookups, large,, modern bathhouses with showers, toilets and sinks, and dumping stations to provide convenient waste disposal for RVs and trailers.

#### Judging Competition and Cattle:

"Marshall Ruble, Ruble Family Simmental, is experienced at pulling these events together and will be heavily involved in gathering the livestock. We are working with the Iowa State University (ISU) Beef Farm as well as local producers to come up with classes." Heaton said, "The ISU Judging team has volunteered again to assist with the judging competition."

#### **Other Events and Activities**

Currently, we are planning two educational presentations in coordination with Iowa State University, details to come.

#### **Local Attractions:**

Des Moines has many enjoyable options for out-of-towners, including, but not limited to: a Living History Farm, Adventureland Water Park, and Sleepy Hollow Sports Park.

#### Food:

"We will also be providing a number of meals at the Beef Headquarters on the fairgrounds," said Heaton. "The awards ceremony will be held on the fairgrounds at the 'Varied Industries Building', but don't forget that tickets are required! To accommodate our guests we will also end the event with a brunch."

"Our goal is to make Diamonds and Denim in Des Moines a huge success, but more importantly, to make it an event that families can attend and not feel pressured by the cost," Heaton concluded. "If the sponsorship continues to come in, we will be able to provide all of the meals throughout the week for the exhibitors and their parents. We are confident that our AJSA members, their families and their advisors will depart from the 36th Annual National Classic with fond memories and good feelings."

#### 

purchased separately for \$40/each. This is to alleviate confusion from setting the Bred and Owned, and also Owned cow/calf entry fee at \$80 and potentially causing a cow/calf pair exhibitor to pay for the calf stall twice.

#### **Points Reconciliation**

The AJSA proposes that in the final points scoring for the overall exhibitors, that the highest placing animal shown will be the points used for the exhibitor. Therefore, if an exhibitor showed a steer that received 3rd High Overall in the Bred and Owned Show, and 5th High Overall in the Owned Show, then the higher of the points would be used. Rather than averaging the two points together in the overall calculation.

#### **Animal Ownership**

#### **Bred and Owned**

**Bred and Owned:** The exhibitor's name is the only name on the registration certificate at the time the animal was conceived and the exhibitor has been the sole, continuous owner of the animal. Sibling partnerships and authorized representatives are not eligible for the bred and owned division. Please note that registration paper issue date requirements still apply to Bred and Owned cattle. Be sure to get your cattle registered early.

#### Owned

**Owned:** The registration certificate is issued in either the name of the exhibitor or the name of a paid ASA membership for which the exhibitor is an ASA certified authorized representative. Make note of the May 5 (Regional Classic ownership deadline) and May 16 (National Classic ownership deadline) issue date requirements on registration papers, and be sure to get your cattle registered early.

#### **Authorized Representatives**

What is an ASA authorized representative?

• An authorized representative is a person who is linked to an ASA membership account. Authorized representatives have been granted the power to carry out all account activities with the same authority as the account holder.

#### How is an authorized representative added to a membership account?

• Contact the processing department at ASA by calling 406.587.4531 or emailing simmental@simmgene.com. It is a simple process requiring written permission and a signature of the membership account holder.

#### Bred and Owned Show Rule Language

Being as that no prior language existed for the newly separated Bred and Owned Show, the AJSA proposes the following to be included in the rules and entry forms for 2016. Whereas, the first sentence would not exist in 2017, only the remainder of the statements.

**NEW for 2016:** The 2016 Denim and Diamonds National Classic will host the first stand-alone Bred and Owned Show, with a separate judge from the Owned Show. The Bred and Owned Show will precede the Owned Shows in each respective division. For example, the Steer Bred and Owned Show will begin at 8:00 AM Wednesday, July 13, and will be followed by the Owned Steer Show, then the Cow/Calf Bred and Owned, etc.

The Bred and Owned Show will have a separate and equal entry fee from the Owned Show. Entering an animal in the Bred and Owned Show and the Owned Show will still only count as one head, per the maximum number of head rule. Exhibitors in the Bred and Owned Show must be the recorded owner of the dam of the animal at the time of conception. Exhibitors must also be the sole recorded owner of the animal since birth, with no history of an owner transfer.

#### **Entry Fee Update**

In agreeance to the Activities and Events ruling at the January board meeting in Denver, the Bred and Owned Show will have a separate entry fee from the Owned Show. Therefore, the proposal exists to dismiss the "stalling fee" and create two separate, yet equal, "entry fees" for both shows. Therefore, when entering the National Classic show, an exhibitor will have the option to enter either the Owned Show (\$40) or the Bred and Owned Show (\$40), or both (\$80) if desired.

Furthermore, the AJSA is proposing that the Bred and Owned, as well as the Owned Show entry fee exist at \$40 each, including cow/calf pairs. Previously the cow/calf pair entry fee was double, \$80, in order to cover the stalling cost of both the cow and the calf. The AJSA suggests, in order to alleviate confusion, that an entry into each show (heifer, steer, cow/calf) will be \$40. By entering the show, however, the cow/calf pair will only receive one stall. If additional stalls are needed for the calf(s) then they can be

### Meet

Emily Jackson Director, Youth and PTP Programs

"I am beyond excited to begin working with the ASA and AJSA, particularly the youth. Growing up in a breed association myself, I know how impactful junior programs can be, I can't wait to get involved and give back!"

#### **DIRECTORS' DIALOGUE**

jatkins@simmgene.com

By Jackie Atkins, Ph.D., Director, Science and Education

#### The Case for Carcass

It is easy to lose site of the big picture from time-to-time. I certainly am guilty of this in my life. I wanted to take the opportunity to reflect on why we are in the beef business. Hopefully, we all can agree, one big reason is to help make delicious and nutritious protein, beef. While specific goals certainly change among our breeders, at the end of the day, beef seedstock breeders provide genetic material for future generations of calves with the end product being beef for consumption. Because of this, it only makes sense that improving carcass traits is important. In this article, I would like to

make the case for the importance of collecting actual carcass data to improve carcass traits.

A question often asked by breeders is: "When we can collect ultrasound measurements so easily and relatively inexpensively, why should we be concerned with collecting carcass data?" The direct answer is that ultrasound traits are not the same as carcass traits. And since carcass traits are the traits we get paid for (the economically relevant traits; ERTs), they are the traits we need to emphasize. Further, we can only achieve high levels of accuracy on carcass traits by collecting actual carcass data.

Does that mean ultrasound traits are of no value in cattle breeding? Absolutely not! Like many traits we record, ultrasound traits are considered "indicator" traits. Though they may not have a direct impact on profit, because of their genetic relationship to ERTs, indicator traits can help us better predict ERTs.

Birth weight is an ideal example of an indicator trait, in that it provides a fair bit of information about the trait we are actually interested in — calving ease. Because birth weight has a strong genetic correlation with calving ease (.8 in our genetic evaluation), by collecting birth weights we will increase the accuracy of our Calving Ease EPDs. That said, as strong as the correlation between birth weight and calving ease is (.8 is the strongest correlation in our genetic evaluation), there is a limit to the amount of insight birth weight can provide in our prediction of calving ease. In genetic evaluation lingo, there is a limit to the level of accuracy we can achieve in the prediction of calving ease by simply using birth weight. The concept of an indicator trait having limitations in its predictive value is important in understanding the reason we need to collect carcass data.

It turns out we can objectively quantify the accuracy limitation in using indicator traits to predict ERTs by employing the BIF accuracy equation (which is how we calculate the accuracies associated with EPDs). The BIF accuracy is defined as  $1 - \sqrt{R^2}$ ), where R<sup>2</sup> is the proportion of the genetic variation in the EPD trait accounted for by the information on the animal. If you play with this equation, you will quickly see that animals having little information (R<sup>2</sup> approaching 0) will have low accuracy, which certainly makes sense.

That said, if we are only using an indicator trait to predict an ERT (e.g., birth weight to predict calving ease), is limited by the proportion of the genetic variation one trait accounts for in the other trait, which is the genetic correlation squared. As I mentioned, the genetic correlation between calving ease and birth weight is .8. If we square that we end up with .64. If we plug .64 into the R<sup>2</sup> term in the BIF accuracy equation, we end up with .4. This means that we could have an infinite number of birth weights on a sire's offspring, but the maximum accuracy we could achieve for his Calving Ease EPD would be .4 if we had no calving ease scores contributing to his evaluation — certainly an accuracy you would not bet the farm on.

Ultrasound measurements are routinely used as indicator traits for carcass EPDs but similar to the above example, we cannot achieve high accuracy EPDs for carcass unless we collect actual carcass data on progeny. Recently, researchers from Iowa State, Theta solutions LLC, and the ASA, undertook the task of recalculating estimates for heritability and genetic correlations of carcass traits and ultrasound measurements using data from ASA's database. The ultrasound prediction of marbling had the highest correlation of 0.73, followed by Ribeye area (0.56), and fat thickness (0.38). Using the BIF accuracy equation, if no one reported actual carcass measurements, the maximum accuracy we could gain with ultrasound data for marbling would be 0.32, 0.17 for Ribeye area, and 0.14 for fat thickness.

Coming back to our big picture view on our role in the world, I hope we all agree that we need to continue to improve the genetics for quality beef. The only way to achieve "proven" animals, animals with high accuracy EPDs for carcass traits, is to collect actual carcass measurements. The structure of the beef industry does not make this an easy process but it is still an important record to collect. One way to collect this data is to enroll bulls in the ASA's carcass merit program (CMP). The CMP collects carcass data and now feed intake (another hard to collect record) every year on hundreds of calves. The cost to enroll a bull in the CMP is \$1,500 and guarantees at least 12 carcasses per bull. If you have a bull you would like to enroll, contact us today (jatkins@simmgene.com or call 406-587-4531). Alternatively, breeders may have their own cooperator herds or collect carcass data themselves. No matter the source, I implore you, if you agree we are in the beef business, help us predict EPDs for beef traits by recording actual carcass data with the ASA.  $\blacklozenge$

#### By AJSA Trustee Tanner Howey, Rowlett, TX

For the past six years I have been showing Simmental cattle at the state, regional, and national levels. I first started showing Angus cattle in the Texas junior major shows. The summer after my first Texas show season my aunt, uncle and I took three head of Simmental heifers to the Texas Junior Simmental Simbrah Association (TJSSA) state show in Tyler, Texas. After having a great time with so many new friends and making

amazing memories, I knew what breed I belonged in. Later that summer I got to attend the 2010 AJSA National Classic in Des Moines, Iowa. After the drive up we got unloaded and I quickly saw the amazing things the AJSA has to offer. Not only did I make some amazing friends from all over the country, that week I learned more then I ever have in a five-day period.

At the AJSA Regional and National classics every contestant must participate in four of the five contests to be able to show their heifer. The contests are: showmanship, sales talk, cattle judging, public speaking and the cattlemen's quiz. I personally believe that those contests have given me the majority of my knowledge that I use in this industry. The contests are meant for the junior contestant to learn more about bovines mostly about Simmental cattle. I know when you are young, you're probably scared to go to public speaking or go give your sales talk speech but don't worry about that, what matters is that you tried your hardest. Remember that if you always try your hardest it will pay off in knowledge and knowledge is priceless.

Way back when at my first National Classic awards banquet, I looked up at the table of the Board of Trustees and I told myself I wanted to be up there one day. If I remember correctly, Webb Fields was the president that year, I have to admit that he and his Board of Trustees put on a Classic that I'll never forget. I had a dream to be an AJSA trustee since my first National Classic and without my aunt making me participate in the contest I probably wouldn't be one. Now that I am an AJSA trustee I have to look back and say "thank you" to my family for taking me to all the Classics and thank you to all the lifelong friends that have helped me get here. My first year of my first term of being an AJSA trustee is almost over and it went by too fast honestly. For my first year as a trustee I really wanted to connect with the junior members to see what could be improved. Most of the time when I ask a junior member what they think should be changed — it's always to take out the contests. What most juniors fail to realize is that the material used for the contests is used everyday in our industry. I want every AJSA member to fully understand that, not only that but every junior member needs to realize all of the opportunities in our junior association. The Silver and Gold Merit awards are scholarships funded by the Foundation; I myself won it this past summer.

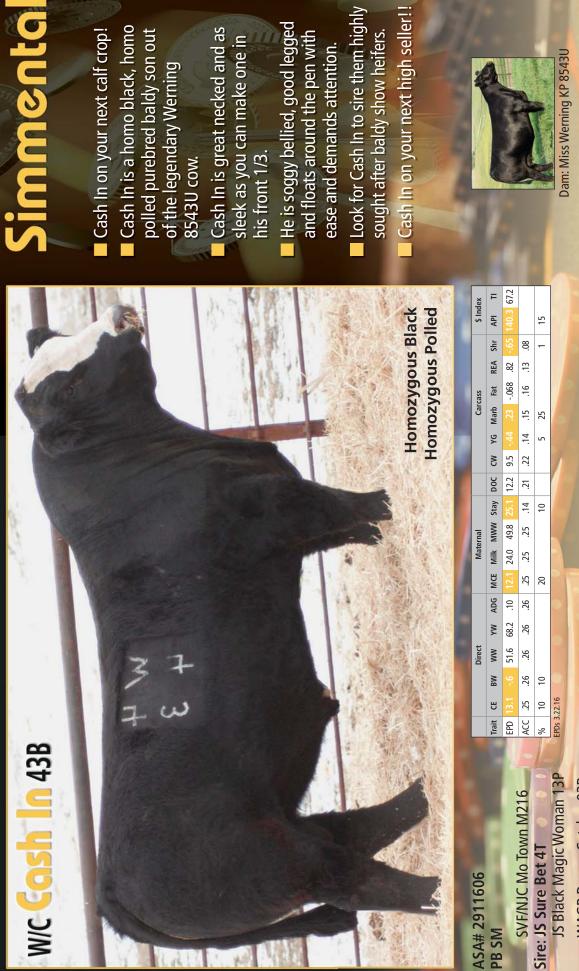

This organization has molded me into the person that I am today. If you knew me six years ago, you would know that I was the shy kid that sat in the corner of the room and never said anything to anyone. By participating in the contests that are offered I have come out of my shell and the Board of Trustees are here to help you get out of yours, too. I know this summer's National Classic is going to be one of the biggest we have ever had, and I'm glad it will be back in Des Moines for my first National Classic as a trustee. I can't wait to see all my friends from around the country and to make many more.

If you and the family just want to get away for a vacation, you want to learn more about Simmental cattle, or just need a confidence boost, then come to the AJSA National Classic in Des Moines for a fun filled week.

#### **NEWSMAKERS**

#### **Jackson Joins ASA Staff**

Emily Jackson, who was raised near Waco, TX, on a diversified cattle operation that included registered and commercial Brangus and dairy, has joined the American Simmental Association staff

Jackson as Director of Youth Development and PTP Programs.

Her family's operation also included a background operation for dairy calves, owns a Bermuda sprig business, and grows corn and milo. As a youth, she was heavily involved in National Junior Brangus Association activities as a board member and has considerable experience with a breed association and youth programs.

After attending Butler Community College, Eldorado, KS, where she was a member of the livestock judging team and was a part of the 2012 All-Kansas Academic Team, she enrolled at Texas Tech, graduating with a Bachelor of Science Degree in Animal Science.

Following graduation, she served as Youth Activities Intern for the State Fair of Texas, managing all competitive events. More recently, Jackson worked for the Ohio Beef Council and the Ohio Cattlemen's Association as Director of Public Relations and Marketing. Her duties there included overseeing the Young Cattlemen's Conference, Foundation fundraising and scholarship programs.

She is moving to Fayetteville, AR, in early April and will be married to Garrett Lochner in June. She will begin her duties with ASA on April 11, and will be immediately challenged, given the organization's looming schedule of Regional and National Classics. "I am eagerly looking forward to being a part of the American Simmental Association team, " she said.

Wade Shafer, ASA Executive Vice President offered this comment. "We are very pleased that Emily has accepted our offer of employment. Her background in the industry and varied experience in working with young people will enable her to hit the ground running. Several dozen very qualified applicants were interested in this position, and she quickly rose to the top."

**34** April 2016

Mikell & Mary Cheek Davis, Owners

#### Jones to Represent ASA

Sarah Jones, of Lafayette, TN, has been named to represent the American Simmental Association on the 37th Young Cattlemen's Conference (YCC), June 1-9. The YCC, which is coordinated by the National Cattion (NCBA) starts in

Jones

tlemen's Beef Association (NCBA), starts in Denver and concludes in Washington, DC, and is designed to help young industry leaders understand critical issues that range from production to research to marketing.

Jones and her husband, Bart, own and operated Red Hills Farm, a 7th generation, diversified family farming operation that straddles the Tennessee and Kentucky state line. Their cattle herd consists of 450 head of Simmental, SimAngus and Red Angus cows, 100 sows and 150 acres of burley tobacco. In addition, the farm also produces corn, soybeans, rye, wheat and triticale.

Red Hills cattle are marketed through a bull and female sale, which has been held on the farm for the past 11 years.

A graduate of Western Kentucky University with a degree in Accounting and Agriculture, she is a Certified Public Accountant. Sarah and Bart are the parents of an eight-year-old son, Ty.

#### Three Named to Marketers HOF

Three long-time beef industry professionals have been inducted into the Livestock Marketers (LM) Hall of Fame (HOF) in ceremonies conducted during the most recent National Western Stock Show in Denver. The honorees are Don Birk, El Dorado Springs, MO; Jack Chastain, Fort Worth, TX; and the late Tom Stromberg, Manhattan, MT.

Birk was associated with the University of Missouri as a successful livestock judging coach before joining the staff of *Drover's Journal* in 1972 and was employed by National Cattle Services beginning in 1978.

Chastain was well-known throughout the industry for his long and productive career with the Texas Hereford Association.

Stromberg, who was honored posthumously after passing away in 2015, was affiliated with the American Hereford Association throughout his career.

# MEET THE TEAM

This is the latest installment in a series designed to "personalize" ASA's Representatives so that the membership can become more familiar with individual credentials and more easily recognize name, faces and responsibilities.

#### Billy Moss, McCormick, South Carolina

Moss's 45-year adventure with Simmental began in 1972, when Simmentals were a relatively new factor on the North American cattle scene. He has been a fervent advocate of Simmental genetics and their use in crossbreeding spanning several decades. He has organized countless field days and seminars many that featured appearances from American Simmental Association staff, animal scientists and other industry leaders.

Moss has been a driving force behind the Georgia Simmental-Simbrah Association's (GSSA) highly visible profile throughout the state and region. He has filled each of the GSSA's officer posts, including president, and for much of the past decade has served as executive secretary.

He has been diligent in assuring a Simmental presence at conventions, trade shows, state fairs, as well as countless local and county cattle events. He was largely influential in getting percentage Simmentals added as a breed show. In addition, he was a founding member of the very successful Bull Power Group, a forage-based bull development and sale featuring SimGenetic breeders. With a B.S. in Agriculture from University of Georgia, Moss spent 33 years as an agricultural teacher and area animal science teacher, before retiring in 2007. During his monumental career, he conducted numerous livestock classes and clinics, seldom missing an opportunity to emphasize the significance of crossbreeding. Active in state cattle events, he served a term on the Georgia Cattlemen's Association Executive Committee, and was co-chairman of the State Steer and Heifer Shows for 10 years. In 2008, Moss was inducted in the Georgia Agricultural Education Hall of Fame, one of many honors bestowed during his remarkable career.

Since joining the ASA Representatives team, Moss has been named as a 2016 Golden Book Award recipient by the ASA, an award that recognizes individuals who have made significant contributions to the development of the Simmental/ Simbrah breeds.

Moss and his wife, Callie, currently reside in McCormick, SC, where Callie grew up; and just 14 miles from Moss's hometown of Lincolnton, Georgia. Their family includes six children and 12 grandchildren.

### **STATE SCENE**

#### Nevada Case Overturned

The Ninth US Circuit Court of Appeals has ruled against the estate of the late anti-government rancher Wayne Hage over a long-running dispute. The case was remanded to a new federal judge because of bias on the part of the original judge who heard the case.

The new decision found that Hage and his family's cattle "had openly trespassed on federal lands, and the original judge harbored animus toward the federal government." Predictably, a small, but vocal contingent of dissidents has loudly disagreed with the court's findings.

#### Wolf Depredation Investigated

The California Department of Fish and Wildlife released a report of wolf depredation on cattle in Siskiyou County. The incidents were classified as "probable" meaning there is some evidence to suggest wolf predation in death of a calf. A separate incident involving a full grown cow was listed as "possible" for a wolf kill.

Reported wolf depredation incidents may be classified as either: confirmed, probable possible/unknown or other. The California classifications are based on criteria used by USDA/Animal and Plant Health Inspection Service wildlife services.

#### **Recent Cattle Mutilations in Two States**

Kansas and Georgia producers should be vigilant in keeping watch over their herds due to recent incidence of cattle mutilations. A cow in McPherson Country, KS, had its eyeballs removed and was the second mutilation in two weeks. Another animal was killed and has its genitals removed. There was no information on how the animal died.

In Georgia, cows were found mutilated with neatly cut circles sliced into their rear-ends with no indication of an animal attack. County Sheriff's office said investigators couldn't explain their deaths; reports have been received of similar, but somewhat different incidents over the past few years.

#### Johne's Disease Hits California

Five free-ranging tule elk in the Point Reyes National Seashore in California have tested positive for Johne's Disease. This is the first positive result since elk testing started over a year-and-a-half ago as a part of Seashore's pending ranch management plan.

Johne's infects both elk and cows, and the disease can pass between the two species, which are mingling more and more as two elk herds have grown and encroached on federal pastureland. Typically, Johne's spreads through manure and is more common in dairy cattle than in beef cattle. ◆

# ARE HORNS IN YOUR FUTURER

Introducing GeneSTAR<sup>®</sup> Horn/Polled from Zoetis—to take the guesswork and legwork out of determining heterozygous and homozygous polled genotypes in Simmental seedstock.

- Available as a standalone test, or at a reduced price as an add-on with SireTRACE<sup>®</sup>
- Tested homozygous polled seedstock generally command premiums
- Help eliminate horns from your commercial bull buyers' futures through documentation of Horn/Polled genotypes in Simmental seedstock

#### Announcing

The Blockbuster Cattlemen's Group and members' fall calves included those sired by Lundy's Do It All and MCMF Red Domaine. Calving ease was apparent with every birth, as was a vigorous, healthy start for all calves. Heifers, cows, bulls and embryos for sale at 443-465-6159 and 814-591-2125.

### **MENU MORSELS**

Spicing up your dinner table with tasty, beef-based dishes.

#### **Slow Cooker Soup**

#### Ingredients

- 1 pound stew meat cut into 1 inch cubes 2 cups water
- 2 cups tomato juice
- 2 tbsp onion chopped
- $\frac{1}{2}$  cup celery, diced
- $\frac{1}{2}$  cup carrots, diced
- $\frac{1}{2}$  cup cabbage, diced
- 2 cups potatoes, cubed
- 1/2 tbsp salt
- 1 tsp Worcestershire sauce
- <sup>1</sup>⁄<sub>4</sub> tsp. chili powder

#### Directions

- 1. Brown beef in pan
- 2. Combine all ingredients into slow cooker
- 3. Cook on low heat for 10-12 hours or 4-6 hours on high heat

Editor's Note: Each month a favorite beef recipe is presented in this space. the Register encourages and welcomes contributions to this column from the ASA membership. Régister SIMGENETICS

#### 2015 and 2016 Sale Averages

### **INTERNATIONAL**

#### US Ag Exports in Decline

Agricultural exports for fiscal year, 2016 are forecast at \$131.5 billion, which is \$8.2 billion below fiscal 2015 exports of \$139.7 billion. That forecast is down \$7.0 billion from August projections, primarily due to lower exports to China, Japan, Canada, Mexico and the European Union.

Canadian exports are expected to drop by \$500 million, to \$21.3 billion, but that country continues to rank number one, while China is the second largest market for US agricultural exports at \$18.2 billion.

#### Macau Opens to US Beef

The full range of US beef products has gained market access to Macau Special Administration Region. US beef shipments may be shipped to Macau as transshipment through Hong Kong with a Hong Kong designated FSIS health certificate or directly to Macau with a Macau designated FSIS health certificate.

Macau had previously only allowed market access for bonein products originating from animals under 30 months of age and boneless beef from animals regardless of age. Following recent negotiations, Macau has granted full market access for US beef products.

#### Beef Rumors Lead to Trucker Death

In India, 2,000 people gathered to protest the killing of a teenage Muslim truck driver who was suspected of transporting beef. He was burned to death in the cab of his truck. According to the report, the truck driver was transporting coal, not beef.

Hindu militants are suspected of carrying out the attack, in which gasoline bombs were reportedly thrown into his vehicle. The murder of the truck driver is the second attack of this nature. In the first, a mob killed a Muslim man rumored to have slaughtered a cow.

#### China to Produce 100K Cattle Embryo

Chinese scientists have signed a deal to establish the largest commercial animal cloning center in the world. The national press agency reported that the facility plans to clone animals including sniffer and pet dogs, beef cattle, and racehorses.

Initially, the plant will produce 100,000 cattle embryos a year, and eventually it will increase to 1 million. Chinese farmers are currently struggling to produce enough beef cattle to meet market demand. The center will also include a gene storage area and a museum.

#### **Canadians are Eating Less Meat**

The Conference Board of Canada (CBC) revealed that meat consumption in Canada has declined. A study indicated Canadian consumers are eating 31% less pork and 19% less beef than they did in 1999, while chicken consumption has risen 11% in the same period.

Reducing the intake of red meat for health reasons for an aging population, Canadian immigrants who give up meat for religious reasons, and higher prices of pork and beef are reasons given for the decrease.

**BEEF BUSINESS** 

#### **Credit Demand Rises**

Demand for bank loans, loan extensions and renewals have surged among US farmers. Farm incomes are forecasted to fall for a third year in a row, as grain and livestock prices remain low.

The report found that the US farm economy continued a downward slide in the fourth quarter of 2015, as a strong dollar, sluggish export demand and an excess of grain have dragged down wheat prices to a six-year low. The USDA projects that farm net incomes in 2016 will drop to \$54.8 billion, down nearly 3% from a year earlier.

#### **Demand for Ag Grads Rises**

The five-year forecast for college graduates in agriculture and food industries shows there will be 57,900 jobs available per year; however, the nation's agriculture colleges will only graduate approximately 35,400 students annually.

Graduates majoring in fields outside of agriculture are filling these jobs, but employers prefer graduates with background in the field. Production agriculture jobs account for 15% of the available positions, while half of the jobs are focused on ag business and management, 12% are in agriculture education.

#### School Lunch Standards Working

After the new school lunch standards were implemented, nutritional value of foods chosen by students increased 29%. Despite opposing claims, participation in the school lunch program did not significantly differ after the national standards.

A study found that food policy in the form of improved nutrient standards was associated with the selection of foods higher in nutrients that are of importance in adolescence. Congress is set to take up reauthorization of school nutrition later this year.

#### Meat Institute Updates Site

North American Meat Institute (NAMI) has unveiled the updated MeatPoultryNutrition.org, a comprehensive website detailing the important role that meat and poultry play in a healthy, balanced diet.

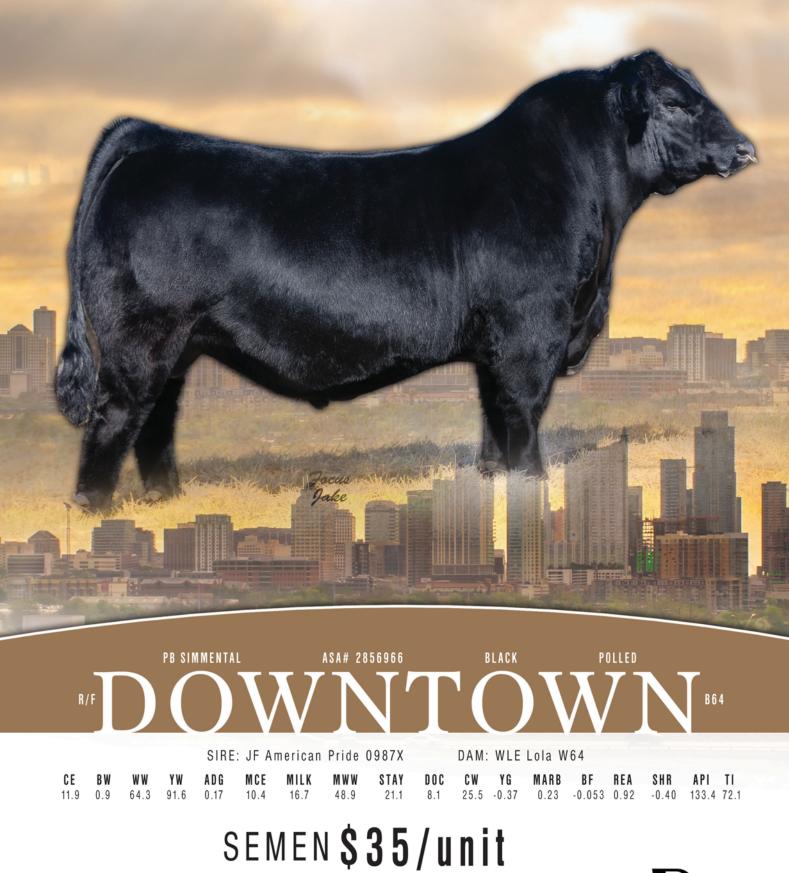

The site features a scientific library that organized 120 recent peer-reviewed published studies that affirm the safety and nutrition of balanced diets, and it includes a section about key nutrients, information on buying and preparing, and a guide to labels for meat and poultry.

#### Hog Inventory Highest in History

The US inventory of all the hogs and pigs in December 2015 was 68.3 million head, up 1% from December 2014 — the highest inventory of all hogs and pigs since quarterly US estimates began in 1988.

Breeding inventories sit at six million head, up 1% from last year, and market hog inventory, at 62.3 million head was also up 1%. The average pigs-saved-per-liter was a record high 10.53 compared to 10.23, last year. Pigs-saved-per-litter by size of operation ranged from 8.20 per operation with 1-99 head to 10.6 for operations with more than 5,000 animals.

#### **Ostrich May Enter Market**

Ostrich is common in the cuisines of many African and European countries, but in the US, it's rare. One Idaho native, Alexander McCoy, lived and worked in South Africa, where they eat ostrich like chicken.

He learned more about the animal as a food source and discovered it to be tasty, lean, and sustainable protein. Unlike other birds, Ostrich is a red meat, 97% fat-free, high in protein, low in cholesterol and high in iron.

#### Farmland Values Remain Steady

Although net farm income dropped significantly in 2015 due to declining crop and livestock prices, farmland values continue to remain high. Very high-quality land is selling for very good prices, but marginal land is seeing some decreases. Land prices have increased faster than land rent.

In the past, the value of farmland has closely paralleled commodity prices, but demand for subdivisions and recreation have kept prices higher.

CattleMax cattle management software

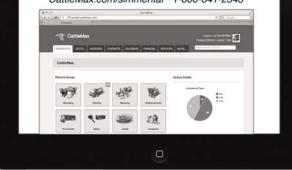

You've seen the CattleMax name around since 1999. It is the cattle software chosen by ranchers in over 70 countries. Now CattleMax is where you are - at home, at the office, or in the pastures.

ASA members will appreciate the ease in exchanging information with ASA including herd inventories, EPDs, performance data, and registrations.

Let CattleMax help you...

- · Save record keeping time
- · Keep organized in one place
- Improve decision making

Sign up for your free trial today at: CattleMax.com/simmental • 1-800-641-2343

#### **Grazing Fees Increase**

Grazing fees on Bureau of Land Management and US Forest Service managed public lands have been increased from \$1.69 an animal unit month (AUM) to \$2.11, provoking protests from the Public Lands Council. Compared to grazing fees on state and private lands, the fee is a tremendous bargain, derided by critics as a "significant subsidy" to ranchers.

Critics have pointed out that a calf at the side of a cow will gain an average of three pounds per day up until weaning. Therefore, roughly one pound of that gain pays for an entire month of grass for the AUM, which includes the cow and the calf.

#### **Blizzard Kills Cattle in Thousands**

Across the Texas panhandle, a winter storm has killed 12,000 beef cattle and left 40,000 beef cattle missing. Four thousand feedlot cattle died in the storm, while another 6,000 to 8,000 stocker cattle perished on the High Plains.

A rancher in Muleshoe, Texas, lost 15 cows in one snowdrift, and another cattle company lost 100 cows not including cow-calf pair loses. Numbers continue to rise as snowdrifts melt, revealing more dead animals.

#### **Justice Being Served**

The armed takeover of the Malheur Bird Refuge near Burns, OR, has been resolved, with more than a dozen anti-government activists now in jail and awaiting trial, including the two sons of the infamous Cliven Bundy of Bunkerville, NV.

In addition, government law enforcement officials received a unexpected bonus, when Bundy flew into Portland to visit his sons and was promptly arrested and charged for his role in the armed standoff near his Nevada home two years ago. More than 200 heavily-armed "friends" had shown up to prevent the BLM from removing Bundy's cattle from public lands, for which he had not paid required fees. Because they were drastically outgunned, the government officials backed off and waited patiently for an opportunity to arrest him.

#### **Firefighters Help Cow**

In January, eight Greely, CO firefighters spent about an hour rescuing a cow trapped after falling through creek ice. First responders found the half-frozen animal after she had been in an 8-foot deep part of the stream adjacent to the South Platte River.

A utility rope was tied around the body of the cow and she was pulled to safety with the help of a loader that has been working in the area. The cow was pulled from the creek with only minor cuts, and was put out to pasture.

### THE CUTTING EDGE

#### Grasslands Closed Due to Cattle Deaths

Nearly, 2,500 acres of the Cimmaron National Grassland in Kansas have been closed pending the outcome of an investigation into the mysterious deaths of seven cattle. Six of the deaths happened in close proximity of each other in a low-lying area and an additional cow was located a short distance away.

The deaths do not appear malicious. Following a necropsy, a veterinarian determined the cattle died from inhaling an unknown substance. The grazing area includes the Stirrup Oil Field and the oil company that works the area in conducting tests.

#### Vegan Men Viewed as "Less Masculine"

According to new research published in the journal, *Appetite*, men who have chosen veganism as their lifestyle of choice are not perceived to be as masculine as their meat-eating peers.

A psychologist at Earlham College in Richmond, IN, conducted three online studies of 130 adults apiece to gauge attitudes toward both men and women who have chosen a variety of diets. The choice of a vegan diet, according to the findings, says men are not seen as aligned with the stereotype of masculinity.

#### **Beta-agnostics Studied**

The use of beta-agnostics in beef cattle production has been highly scrutinized following concerns of animal welfare, which has led to the removal of Zilmax (zilpaterol hydrochloride) from the market by the manufacturer. Improving animal well being through careful use of these feed additives and managing the animal's environment to minimize stress has remained a focus of much research.

A recent study evaluated the effects of supplementing Zilmax to finishing steers during the last 21 days on feed on performance, carcass characteristics, heat stress, mobility, and body temperatures with two different diets, one with Zilmax during the last 21 days and one without it.

#### Researchers Lead Fight Against Food Fraud

Researchers at Michigan State University (MSU) are helping governments, manufacturers and retailers around the globe develop strategies to prevent food fraud, defined as "intentionally using deception involving food for economic gain."

Chinese Walmarts last year recalled donkey meat, a popular snack, after tests showed the product also contained fox meat. After the scandal, Walmart sponsored a food fraud course that was led by MSU and researchers published a paper on creating a system-wide focus for preventing food fraud. ◆

### **CORPORATE REPORT**

#### Wendy's Focuses on American Beef

Wendy's long history of burger success begins with cattle producers and fast food franchise has remained near the top of a competitive and evolving fast food market.

With 6,479 restaurants in 29 countries, one could assume Wendy's would follow the lead of other international fast food brands and utilize import beef; however, the companies 5,722 restaurants in the US and 354 restaurants in Canada utilize only North American beef.

#### JBS Chairman Charged

Brazilian federal prosecutors have charged the chairman of JBS SA with "crimes against the financial system" sparking a selloff in the shares of the world's largest meatpacker. According to the indictment, the now-defunct Banco Rural SA lent 80 million Brazilian reais (\$19.7 million) in 2011 to a pair of firms controlled by J&F Investimentos, SA.

These companies then deposited the money in J&F's financial unit, which lent the 80 million reais back to Banco Rural's parent company, Trapézio SA. Prosecutors say this triangular-credit transaction was intended to circumvent a Brazilian law prohibiting loans from one financial entity to its owners.

#### **Trans Canada Files Lawsuit**

Trans Canada has filed a lawsuit over the US government's rejection of their proposed Keystone XL Pipeline project. The company plans to file a second legal challenge that will seek more than \$15 million in damages.

The lawsuit is asking for a favorable ruling that the denial of the pipeline permit was without legal merit. The US government, with the support of an activist group of Nebraska ranchers, had denied the request largely because of environmental concerns.

#### Fertilizer Plant Warning

Dozens of Texas plants similar to the fertilizer factory that exploded in the town of West in 2013, one of the worst industrial accidents in US history, continue to operate near schools, hospitals, and residential neighborhoods.

The Chemical Safety Board says there are 80 plants in Texas that store more than 5 tons of ammonium nitrate, a chemical used in fertilizer. About half of them are fertilizer plants similar to West Fertilizer Company, where a fire led to an explosion that registered at an earthquake magnitude level of 2.1. It killed 15, injured hundreds, and flattened a part of the town.

# 2016 Fall Total Herd Enrollment

The American Simmental Association encourages all members to participate in our cow inventory system. The following information will assist during enrollment of your cow herd.

#### 1. Get Your Preliminary Inventory

(sbould include any cow enrolled in the previous year, first-calf beifers, and purchased cows)

• Use the Data Entry section of Herdbook Services from our website <u>www.simmental.org</u> or complete paper inventory and return to ASA.

#### 3. Provide Enrollment/Removal Data

#### 2. Decide which Cows will be in your 2016 Fall Calving Herd

- "Enrolled Cows" are any females of calving age, 2014 Fall-born females, and jointly owned females managed with your herd
- "Removed Cows" are any females of calving age removed from your herd. Every cow listed not given a removal code will be enrolled in your Fall 2016 herd.

Codes for Enrolling Dams — • ASA number, tattoo, birth date, and breed codes.	Enrollment Codes and Description         0       Cow Bred to Calve During the Season       3       Exposed and Failed to Conceive — Moved to Next Season (Spring 2017)         1       Heifer Bred to Calve During the Season       4       Exposed and Failed to Conceive — Moved to Next Year (Fall 2017)         2       Not Exposed — Moved to Next Season       5       Donor Cow         6       Recipient Cow
<ul> <li>Codes for Removing Dams —</li> <li>At least one is required, however, you may assign up to two removal codes per dam.</li> <li>Remember to place an N in the A/B/C/N column.</li> </ul>	Removal Codes and Description         60       Exposed and Failed to Conceive       68       Died - Other       76       Prolapse         61       Aborted       69       Died - Sickness/Disease       77       Sickness/Disease         62       Age       70       Disposition       78       Sold, Breeding Purposes, Paper Not         63       Appearance       71       Herd Reduction       Transferred         64       Calf Loss at Calving       72       Hoof Condition       79       Sold, Breeding Purposes, Paper Transferred         65       Calf Loss Post Calving       73       Horned       80       Structural Soundness         66       Color       74       Injury       81       Udder Quality       ASA         67       Died - Calving       75       Production/Performance       82       Genetic Defect Status

#### 4. Decide which Payment Option Best Fits Your Herd

These rates apply for enrollments submitted by June 15, 2016.

Enrollment Fees: Registration Fees:	Option A (TR) Total Registration \$15.00 \$0.00	Option B (SR) Selective Registration \$0.00 \$30/\$40/\$50 <sup>a</sup>	Option C (LR) Limited Registration \$7.50 \$30/\$40/\$50 <sup>a</sup>	Option D (CM) Commercial \$500/herd \$30/\$40/\$50 <sup>a</sup>
Choosing the best options:		<sup>a</sup> Depending on age of calf	<sup>a</sup> Depending on age of calf	<sup>a</sup> Depending on age of calf
If you register $> 45\%$ of your calf crop.	1			
If you register < 45% of your calf crop and don't use EPDs for selection decisions.		1		
If you register $< 20\%$ and use EPDs for selection decisions.			1	
If you have a commercial herd.				1
Benefits of Enrolling:				
EPDs to make informative selective decisions.	1	Reg. Animals Only	1	Females Only
Herd participates in genetic evaluation.	1	1	1	1
Reproductive record on every cow enrolled.	1	1	1	1
Commercial cows or cows of other breeds are eligible.	✓	✓	1	1
Requirements when enrolled:				
Every registered SM/SI dam must be enrolled.	1	1	1	
Each dam enrolled must have calf or productivity reported/year.	1	1	1	1
Deadlines to be met for enrollment and calf data.	1	1	1	1

#### 5. Send Your 2016 Fall Inventory to ASA by June 15, 2016

Online — using Data Entry section of Herdbook Services — <u>www.simmental.org</u>
 Email ASA — <u>THE@simmgene.com</u>
 By Mail — One Genetics Way, Bozeman, MT 59718

Call if you would like a paper inventory:

#### Cow 1 — Ms Sooner Pride

Purebred Simmental registered with ASA
Primary Code - 0 - Cow bred to Calve During the Season
A/B/C/N - A - Enrolled in Option A
Bill Code - F - Pay the full \$15.00 for Option A enrollment now

#### Cow 2 — Ms Gator Bite

Purebred Simbrah registered with ASA
Primary Code - 60 - Exposed and Failed to Conceive
Addtnl Code - 74 - Injury
A/B/C/N - N - Not Enrolled, removing from inventory
Remarks - Open

#### Cow 3 — Ms Go Big Red

Commercial cow who is NOT in ASA database

**Primary Code - 6 -** Recipient Cow

A/B/C/N - B - Enrolled in Option B
 Bill Code - Blank - No billing associated with Option B enrollment

#### Cow 4 — Ms Perfect Crimson Tide

Commercial Simmental on file with ASA **Primary Code - 0 -** Cow bred to Calve During the Season **A/B/C/N - C -** Enrolled in Option C **Bill Code - F -** Pay the full \$7.50 for Option C enrollment now

#### Cow 5 — Ms Tough Tiger

Purebred Angus registered with ASA as a Foundation cow

Primary Code - 2 - Not Exposed-Moved to Next Season Spring 2017
A/B/C/N - A - Enrolled in Option A
Bill Code - F - Pay the full \$15.00 for Option A enrollment now

Remarks - Too Small to Breed

Instructions for Online REFORMANCE Enrollment

From the Simmental Home Page www.simmental.org

#### 1. Select Herdbook Online Services

- 2. Log In by entering
  - 6-digit member number (zero filled example: 000317) • Password
- 3. Under Data Entry select Online
- 4. On inventory tab, make sure year is **2016** and season is **Fall**.
- 5. Select Update 2016 Fall THE Cow Inventory

#### 6. Update Inventory

- If the dam is remaining in your herd, enter appropriate Enrollment code in **Primary Code** column
- If the dam has been removed from your herd, select a **Removal Code** and enter in the **Primary Code** column. To designate a second reason for removal, you may enter a **Removal Code** in the **Addini Code** column as well.
- A/B/C/N Enrollment Type If you are enrolling in Option A place A in this column. For Option B place a B in the column. For Option C place a C in this column. For Option D place a D in the column. If the cow is being removed from the herd place a N in the column.
- **Remarks** You may use this column if you wish to have additional remarks on a dam. This column is for member use only, ASA *will not adjust enrollment* based on this column.
- Bill Code This column is to be used by members to indicate how you would like to be billed for your enrollment. A "H" in this column indicates you wish to pay half the enrollment fee at time of submission. The other half of the fees will be billed later on in the year. An "F" indicates to pay the full amount due on each cow for the year upfront. If bill code column is blank an "F" is assumed.
- **To add cows** Scroll down to a blank row. If you do not have a blank row, click on your last dam and hit your enter key. This will create a blank row.
  - Cows on file with ASA\*, enter ASA number in AnmRegNbr column
     Cows not on file with ASA\*, enter tattoo in the AnmTatt column,
  - enter birthdate in **BirthDt** and breed(s) in **BrdCds** column.
  - \*Please note: If your dam bas bad a calf reported to ber or bas been enrolled in THE previously, she will have a number in the ASA system. Please type that number into the AnmRegNbr column so that a new dam record does not get created.
- 7. If there are **Errors** and/or **Warnings**
- Errors (indicated in red at beginning of row) or Warnings (indicated in purple at beginning of row)

• Move cursor over to top of spreadsheet and select tab labeled Errors or Warnings

ASA

- Screen will display each error or warning
- Errors must be corrected before submitting data to ASA
- Warnings may need to be corrected before submitting to ASA
- Jobs may be submitted to ASA with warnings, but not errors
- 8. Once all cows have been given an enrollment or at least one removal code and there are not any errors, select **Submit Data** 
  - A new page will display; if there are no errors, a **proceed to billing** link will be available
  - Select the **proceed to billing** link to display a billing summary. THE is billed at the time of submission, so you will have an invoice amount due if you are enrolling in **Option A**, **C or D`** (after the first deadline all options (A, B or C) will have a balance due).
  - Choose one of the following to complete your job:
    - If you wish to complete payment with a credit card select
       Add Payment. Enter in your credit card information. Select
       confirm. You will then need to select the button Final Submit
       (Only click once). A screen will then show an invoice that you can
       print and store in your records. It should also say Invoice Status:
       Complete.
    - If you would rather mail a check to ASA, select Hold Unfil Payment Received. A screen will then show an invoice with the current amount due that you can print and store in your records.
- 9. To save job and return later, select **Sove and Exit**. The job will remain in an incomplete status under your account. *Please be aware that billing will work off the submission date, not the date the job was initiated.*

10.Submit your inventory by **June 15, 2016,** to ensure the lowest possible THE enrollment fees.

Please double check to make sure your inventory job is complete. If you go to **Data Entry**, select Online and on the left band side choose **Incomplete Jobs**. If your **Inventory Dam 2016 F** job is listed with a button that says **Resume**, it is still at an incomplete status. Select Resume and submit your job through completion.

All above enrollment information assumes inventory submission by **June 15, 2016**.

#### HIGH SELLING BULL AT THE 2016 TRAUERNICHT SIMMENTALS BULL SALE!

Making Tracks exemplifies exactly what his name implies! He has been one special animal since the day he was born. He is the definition of a true standout. He was that calf that caught the attention of everyone who went through the pen. Then, when we took him out in the show ring for the very first time at the prestigious lowa State Fair, he made it as Calf Champion and then went on to take the Reserve Champion Purebred Bull banner! Judge Steve Reimer commented that he just couldn't wait to see how this bull develops...Well, he continues to impress. He has more opportunities than any bull we have ever raised. He has the pedigree...a descendent of the great J&C/SS Bernadette cow. The look...Reserve Champion Purebred Bull at the lowa State Fair. Tremendous growth and power...weaning weight in the top 25% and yearling weight in the top 15%.

Make Tracks Toward More Profit with These Semen Packages! 10 units - \$500 25 units - \$875 50 units - \$1000

### GENOMIC-ENHANCED EPDs—FIND THE BEST FASTER!

The Simmental, SimAngus<sup>™</sup>, Simbrah and SimAngus HT Genomic Profile is now available from the American Simmental Association (ASA) through its partnership with GeneSeek<sup>®</sup>.

GENESEEK

#### Genomic-enhanced EPDs (GE-EPDs) provide:

- **Confidence**: The ASA GeneSeek Genomic Profiler<sup>™</sup> (GGP-HD) was developed by a team of scientists using almost 3,000 genotypes and millions of phenotypes.
- Accuracy: When paired with ASA's multi-breed genetic evaluation, test results increase the EPD accuracy on Simmental, SimAngus, Simbrah and SimAngus HT animals.
- Simplicity: Along with adding EPD accuracy, a single DNA sample can provide information on parentage, genetic defects, coat color and homed/polled status.
- Value: At \$90 for 80K technology and parentage, the ASA profile is one of the best values in the business.

To start using the power of the Simmental, SimAngus, Simbrah and SimAngus HT profile, please contact the American Simmental Association at 406-587-4531.

hank You

Thank you everyone at HTP Simmentals and Hill Top Simmentals for purchasing SC Antoinette C25 at "The One" sale in Denver. We apologize for omitting your names in the March *Register* — and thank you to everyone involved with the group purchase, and to Eberspacher Enterprises for their

concerted efforts to make this project a huge success. Once again a tip of the hat goes to these Simmental enthusiasts who were involved with this annual fundraising event.

The group of buyers offered this female back to resell and the gavel fell at \$4,000 to HTP Simmentals and Hill Top Simmentals.

The group of buyers along with AJSA Board of Trustees and the Eberspacher Enterprises sale staff.

Sanders Ranch, Owen Brothers Cattle Co., Brandon Eads, Double R Cattle Co. – Ryan Ranes, Oval F Ranch – Don & Matt Fischer, Vestlane Farms – Ed Vest, Gold Buillon Group, Marple Farms – Tory Marple, Robbie & Colleen McDowall, RS&T Simmentals LLC – John & Scott Cowger, Eberspacher Ent Inc., Hudson Pines Farm, 102 River Ridge Simmental, Gerdes Show Cattle, Long Simmental, C-Mor Beef, Ferguson Show Cattle, Missouri Jr. Association, Ruby Cattle Co., JS Simmental, Gonsior Simmental, Tom Bros Simmental, Buddy Robertson, MO Simmental Assoc. & Ozark Empire Fair Foundation, Shoal Creek Land & Cattle and Grindstone Creek Farm.

The total gathered was \$20,000.

Reserve Senior Champion Exh. by Brennan Seal, s. by Mr. Double S R95, sponsored by JV Cattle Co.

Simbravieh Champion Exh. by Lauren Thomas, s. by LMC LF Revelee, sponsored by LaMuñeca Cattle Co.

#### Showmanship

**8-9 Year-Old Division** Emily Denny (1st) Jayci Phillips (2nd)

**10-11 Year-Old Division** Kaily Critendon (1st) Waylon Hinze (2nd) **12-13 Year-Old Division** Robert Stavhnoha (1st) Allison Willoughby (2nd)

**14 Year-Old Division** Zach Mills (1st) Brennan Seal (2nd)

**15 Year-Old Division** Amelia Stavinoha (1st) Olivia Vela (2nd) 16 Year-Old DivisionKailey LeNormand (1st)Payton Meuth (2nd)17 Year-Old Division

Key Lutrick (1st) Caryle Rodenbeck (2nd)

**18 Year-Old and Older Division** Kirby Nixon (1st) Bailey Scogin (2nd)

#### Sponsors

Sponsors, each of whom provided \$1,000 were: 5W Cattle Co., 6G Ranch, Baring Cattle Co., Blissard Cattle Company, Boening Brothers, Burch Farms, C2F Cattle Co., Circle M Farms, Diamond RF Cattle Co., Elmore Cattle Services, Foster Brothers, Freasier Ranch, Hagan Cattle Co., Hallak Ranch, Harris Farms, Hidden Oaks Cattle, JV Cattle Co., Knezek Simmental/ Simbrah, La Hacienda Hinojosa, La Muñeca Cattle Co., La Negra Cattle Co., La Morra Ranch, LPJ Ranch, McCrary Farms, Neumann Farms, Nieschwietz 7N Ranch, Pine Ridge Ranch, Reavis Farms, RGV Cattle Co., Seale Show Cattle, Smith Farms/Diamond C, Smith Genetics, Southern Jewel Cattle Co., Southwestern Farms, Temperance Livestock, Triple C Cattle, Triple J/ Carpenter Ranch, Turkey Creek Cattle Co., and Walters Livestock.

**Note:** At the conclusion, Junior exhibitors of Simmental, Simbrah, Percentage Simbrah and Simbravieh competed for over \$40,000 in prize monies, awards and scholarships. The event in its 24th year has now awarded almost \$700,000 in monies and prizes to 1,500 plus exhibitors of SimGenetics. The show is made possible by sponsors who each put up \$1,000 and junior exhibitors who purchase calves from them are eligible to compete. The event was held in conjunction with the San Antonio Livestock Show and each exhibitor was only allowed to bring one animal to the competition. This year's event drew 115 exhibitors.

The grand champion of each show was awarded \$1,500 and the reserve champions \$1,000, Division champions also received checks and trophy belt buckles were also awarded to each class winner, as well as monetary awards deep in each class.

For more information on the event click on www.simmental-simbrahsuperbowl.com. Also sponsorships for the 2017 event are now being accepted and posted to the website. Contact Tim Smith, 512-587-7896 or Carlos Guerra 956-383-7566 for details.

#### Showmanship Winners

Showmanship judges, top two winners from eight division and event founders posed for a photo. Front row includes Erin Worrell and Tom Wells, judges. Middle row (l to r)Emily Denny, Jayci Phillips, Kaily Critendon, Waylon Hinze, Robert Stavinoha, Allison Willoughby, Zach Mills, Brennan Seal, Amelia Stavinoha, Olivia Vela, Kailey MeNormand, Peyton Meuth, Key Lutrick, Carlye Rodenbeck, Kirby Nixon and Bailey Scogin. Back row (l to r) Carlos Guerra and Tim Smith, founders. The top two from each age group then competed for the overall showmanship titles. Lutrick was named champion and received \$1,000, while Rodenbeck was the reserve champion and received \$750.

Scholarship Winners.

## COW SENSE

Listed below are ten questions designed to test your knowledge of the beef industry. Elite: 9-10 correct; Superior: 7-8; Excellent: 5-6; Fair: 3-4; Poor: 1-2.

- 1. What is the approximate daily feed requirement (on a dry matter basis) for a 1,200 pound mature cow?
- 2. What is the generally accepted minimum scrotal circumference (in centimeters) for a yearling Simmental bull undergoing a breeding soundness exam?
- 3. Which feed would be highest in protein; wheat straw, alfalfa hay, oat hay or ground ear corn?
- 4. What is the major factor in determining carcass quality grade of slaughter animals?
- 5. When puncturing the rumen of a bloated animal, on which side are the trocar and cannula inserted?
- 6. What would be the adjusted 205day weaning weight for a calf that weighed 85 pounds at birth and 591 pounds when weaned at 230 days?
- 7. From what country did the Abondance strain of Simmental originate?
- 8. What is the common term used to describe the condition of a bovine animal that has swallowed a piece of wire, a nail or some other metal?
- 9. In ASA terminology, what do the letters T.H.E. represent?
- 10. In what year was *the Register* magazine founded?

#### Answers:

 25 pounds; 2. 32 centimeters;
 Alfalfa hay; 4. Marbling; 5. Left;
 5.56 pounds; 7. France; 8. Hardware disease; 9. Total Herd Enrollment;
 1987.

to our contending bidders and buyers at our 23rd Annual Production Sale! We appreciate your continued support and enjoyed having you attend our first sale held on the ranch!

February '17	Dec 30	Jan 6	Jan 18	Jan 31
March '17	Feb 1	Feb 8	Feb 20	March 3

#### Send all ad materials to: register@simmgene.com or Fax: 406-587-8853

A non-refundable fee of \$50.00 will be assessed if a client does not meet deadlines or if the client commits to advertising and cancels after the deadline or if the ad must be dropped to ensure on time publication.

Advertising materials (including photos) must be in *the Register* office by the dates listed above. *the Register*, which mails by bulk rate, assumes no responsibility for actual receipt date.

#### **Design Charges**

Advertising rates are for camera-ready ads only. Additional design charges will apply to any ad that is designed by ASA Publication, Inc.

#### Layouts & Proofs

Although every effort will be made to provide proofs on all ads, proofs are guaranteed only if all ad material arrives in *the Register* office prior to deadline.

#### Terms

All accounts are due and payable as invoiced. Interest charges of 1.5 percent per month (18 percent APR) will be added to accounts 30 days past due. If an account becomes 60 days delinquent, all ASA Publication, Inc. work may be suspended until full payment is made. After review by the ASA Executive Committee, ASA privileges may be denied to those with accounts over 90 days delinquent.

#### Advertising Content

the Register and its staff assume no responsibility or obligation to verify the accuracy and truthfulness of advertising copy submitted to the Register. However, the Register reserves the right to reject any advertising copy or photo which the Register deems unsuitable for publication for any reason, including copy or photographs which are false or misleading. the Register assumes no responsibility for the accuracy and truthfulness of submitted print ready ads. Advertisers shall indemnify and hold harmless the Register for any claims concerning advertising content as submitted. Advertising containing pedigrees or statements regarding performance must conform to records kept by the American Simmental Association. Copy deviating from official records may be changed as necessary without advertiser consent.

#### **Editorial Policy**

Opinions expressed are the writers' and not necessarily those of *the Register*. Photographs are welcome, but no responsibility is assumed for material while in transit or while in the office.
