FLECKVIEH NUMBERS

We established a network of Fleckvieh breeders stretching throughout the heart of America.

8 States, 8 Breeders, One Herd.

If combined, we make up the largest herd of Fleckvieh cattle in the USA! The only thing better than Fleckvieh cattle are the incredible people that share a passion for the breed, agriculture and the next generation. We strive to create friendships centered around cattle, not just a one-time customer! Our mission is simple: To provide the bulls, females and frozen genetics that you **NEED** and **DESIRE**. Working closely with one another, our goal is to meet your cattle needs and exceed your expectations with **FLECKVIEH** genetics!

VIEWPOINT

By Steve Eichacker, Salem, SD

Another junior show season is winding down, other than a few county and state fairs, and school is just around the corner for our youth. I was fortunate enough to attend two of the ASA-sponsored events, the North Central Regional Classic in Fargo, ND, and the AJSA National Classic in Louisville, KY. For Cathy and myself, something was different this year. Our youngest had gradu-

ated out of the junior program last year! All the organization of packing tack, feed, cattle, a week's worth of clothes, and maybe a meal or two and snacks for whoever was around . . . was gone. It was just two old farts and a suitcase heading out to see if we could help or some might say, just get in the way!

First off, thank you to all the host states and organizations for stepping up and hosting the events, I've heard nothing but good from all four regions and the Breeders Sweepstakes group for hosting the AJSA National Classic. Another huge thank you to the AJSA Board of Trustees, there is no free ride here, they are a hard-working board that is extremely active in organizing and making sure all the contests run like a well-oiled machine.

I thought the AJSA Board did an excellent job publishing a piece of literature called "The Survival Guide". They talked about how to prepare for the various contests. They

gave a lot of advice on what to expect, what to bring, even how to dress for each event. It's a must for a first-time family and even a good refresher for a veteran.

Helping judge some of the contests is a real eye-opener as to the future of our youth. We've seen young juniors in sales talk who kick the dirt and can't look the judge in the eye, become an intermediate who will look you in the eye but has a hard time handing you his registration paper because his hands are trembling too much. Then as a senior, they give a sales pitch that could sell ice to an Eskimo. That's what the AJSA program is all about. I had more than a handful of parents tell me "whatever you do, never discontinue the contests that go along with the show and showmanship. They are what makes Simmental different and better than the other junior programs."

The other item I'd like to visit about is the PTP rule guidelines that lowers the percentage allowed to show in PTP shows from 1/2 to 3/8 Simmental. It's probably political suicide to even talk about it, but nobody has ever accused me of being very smart anyways! So here goes. . .

We have gotten a fair amount of feedback from the membership on the rule change. I've heard most of the comments, both in favor of the rule change and not in favor of the 3/8 rule change. If you're one of those that have visited with me personally, you know you're not going to get any argument from me one way or the other. I totally understand both sides of this rule change. I've heard or read several comments about this rule change being a product of self-serving board members getting their agenda pushed through. I was on every conference call and every Board meeting as this agenda item was presented in a subcommittee, then it traveled to the Activities & Events Committee and eventually the full Board. There was a lot of great discussion at each level, at no time did I ever feel it was a personal agenda. It was presented as an idea, like many other resolutions, "what do you guys think", then the discussion began. We have a 17-member board of independent thinkers that represent all the different genetic makeups that make ASA the all-purpose breed we are.

I truly feel when 17 board members sit around a table, the decisions are made with what everyone believes is in the best interest for the future of ASA. Yes, there are differences of opinion, but each trustee represents different geographic areas and a variety of breeding programs and represents what they feel will work in their area. Each trustee is entitled to their opinion and we respect each others' opinions, just like we respect the opinions of the membership. All the emails or letters that I have received have been forwarded to the entire board, if the sender gave me permission to do so. Like someone said, "it's good to know our membership has a pulse and is alive!"

Keep in mind, board meetings are open, and we have a meeting in Denver, CO, during the NWSS, an April meeting in Bozeman, and a fall meeting that travels to different host states. It's a great opportunity to sit in on some working committee meetings and interact with the Board of Trustees.

If you have any thoughts or questions on what's going on at ASA, give your trustee a call. I don't know of any that wouldn't be glad to visit. ♦

Clint Berry

"The FPC is a simple and easy tool that commercial cattlemen can utilize to differentiate their cattle in the marketplace. Works in breeding programs using various breeds and has no cost to the producer."

Simmental Down Under

By Lilly Platts

Simmental cattle have long been credited with an impressive ability to adapt — hot, cold, dry, wet, or any combination thereof, the breed can thrive. Close to 9,500 miles away in Australia, Hicks Beef is utilizing Simmental genetics to the fullest extent. The family-owned operation takes advantage of ASA's THE Commercial Option, EPDs produced through the IGS Multi-breed Genetic Evaluation, genomic testing, and an overall commitment to the benefit the beef industry can see from data collection and science. Located near Holbrook, on the border between New South Wales and Victoria, the Hicks family runs a 1,250-head Australian Beef Composite (Simmental, Angus, Gelbvieh-cross) herd, and 200 purebred Red Angus females, and supplies around 200 bulls per year to Australian commercial producers.

Committed to Cattle

Andrew Hicks, the founder of Hicks Beef, has been passionate about genetics since he was a young boy. “My father had a small polled Hereford stud, and I just loved pedigrees from an early age. I was given a dairy cow as a kid and I kept the pedigree of every dairy calf from that cow until I was 15. I wanted to get into genetics and pedigrees,” he recalls.

This interest combined with a love for agriculture made his decision to be in the beef industry easy. “My love for the farm started with the small farm when we lived on the edge of Melbourne. Since I could walk I wanted to farm, and be a farmer.”

Andrew's first introduction to the Simmental breed was in the 1970's. Australia's experience with the breed mirrored that of the US, and despite the added growth of Simmental, many moved on. “I was impressed with the first cross cattle, and then the more it got to purebred, they were bigger leaner cattle that didn't survive in our environment,” he says.

However, Andrew kept an open mind and upon seeing much improvement in the breed, decided to give it another try. “Then we got onto the composite thing, saw the improvement in Simmental cattle in the US, and it impressed us enough to go back and give them a go.”

Hicks Beef has long been committed to improving their program through science and data. Shortly after the formation of IGS, the program became a part of ASA's THE Commercial Option, and today contributes important data and genomic records. Simmental genetics have been an important contribution to the program's seedstock program.

Andrew and his wife, Anne, now run Hicks beef alongside their son and daughter-in-law, Tom and Kate. Tom's involvement with the cattle operation has been paralleled by their utilization of ASA's ability to gather and evaluate data. Around 10 years ago when Tom returned to the farm, they began to fully seek out and utilize the tools available to them. Hicks Beef had always been committed to data, but around this time began gaining access to more powerful avenues for narrowing down their ability to measure progress.

Devoted to Data

The guiding principle of Hicks Beef can be summarized by one word — data. Like any quality seedstock producer, the program takes into account other factors including phenotype. Every year, an independent professional visits the ranch to assess this. Andrew explains, “We cull regularly for feet and temperament. We have someone independent come to the ranch to assess bulls and heifers for their foot score and confirmation.”

However, the foundation of their program comes down to numbers. Six years ago, Hicks Beef enrolled in ASA's THE Commercial Option, and began sending the data they were already collecting to the Association. “It's been the biggest change to our program, using ASA's database. We're linked into the genomics, and just such a huge amount of data. It seems to be doing such a good job over multiple breeds. Nothing like that is available over here,” Tom explains.

Andrew explains that before utilizing these tools they were forced to use more subjective measures of progress. “We couldn't measure what we were achieving. It's been revolutionary for us to have the likes of the figures behind us to take that next step.”

Hicks Beef is a highly committed to using ASA's indexes, especially \$API. As a producer of bulls for commercial operations, they believe that \$API is the most well-rounded tool available across the industry. “What we love about the \$API is it's factors in all of the economically-relevant traits,” Tom says.

In addition to the large amount of data submitted to ASA, and their subsequent use of it in their selection process, Hicks Beef also believes in genomic testing. So far, their program has added around 2,500 genotypes to the evaluation, and was a participant in the Cow Herd DNA Roundup project. “It's for the accuracy of data and knowing our cattle. We can take out as much risk for our clients possible. We think it's essential,” Andrew explains. *(Continued on page 16)*

Simmental Down Under

(Continued from page 13)

Generating Quality Genetics

A passion for the beef industry, belief in data, and progressive philosophy have combined to make the Hicks Beef program a trusted supplier of commercial bulls in Australia. Annually, they sell around 200 bulls. In Australia, a higher percentage of cattle are finished on grass compared to the US, which necessitates efficiency in Hicks' cow herd. Females and bulls in development are never supplemented with creep feed. All calving takes place on pasture, and overall, the cattle have to take care of themselves. "That's how our customers run them, so we want to run them in the same environment so they are tested in the same way," Tom explains.

High labor costs in Australia are another factor Tom mentions, adding to the need for their cattle to be efficient. "We're very focused on our cost of production. We really try to keep our costs as low as we possibly can."

Efficiency is also a part of daily operations at Hicks Beef. Every animal has an EID tag, and chuteside, these tags are scanned and automatically matched with the weight

taken and additional data recorded. Tom explains that they simply have to transfer this data to the computer which eliminates human error. During preg-checking, females are scanned and by the estimated birth date, the program connects the correct sire by this date. All calves are also parentage tested, which is part of the genomic testing package Hicks Beef utilizes.

Hicks Beef measures their progress by the success of their customers. Andrew and Tom point to a feedlot owner who they have worked with for many years as an example of how they see progress outside their own herd. This customer has seen steady improvement, and his experience is especially important as he follows cattle through their lifetime. Andrew explains, "One of our clients is one of the few guys in Australia who breeds his cattle, feeds his cattle, markets his cattle, and sells them directly to the butcher shop, so he really knows what's happening, and he's one of our good clients. I think it shows that the cattle are performing in the feedlot and cutting up well."

They have also been extremely successful in the Australian Beef Spectacular Feedback Trial. "We are in a steer feedback trial where people from all over southern Australia put their steers all together, they are fed the same at the feedlot, and measured for gain, assessed for their carcass, and we've been winners of that several times," Andrew explains. This past year, Hicks Beef had the third and eighth place pens of composite steers.

Selecting Simmental

The Simmental breed has been a major asset to the Hicks Beef program. Their decision to add Simmental to their program was based on the Meat and Animal Research Center (MARC) data they followed. They decided that Simmental would add value to all aspects of their program after observing the changes in the breed from their first introduction in the 70's. Heterosis is at the center of the program, "We're committed to a three-way cross, Angus, Gelbvieh, Simmental, to maintain a high level of heterosis," Tom explains.

The majority of the Simmental sires used in their program are sourced in the US. Tom explains that also within their own herd and the replacements kept back, most of their Simmental genetics originated in the states. Proving the adaptability and versatility of the breed, Tom mentions several programs they buy semen from and also use management principles from, including Clear Springs, Hook, Gateway, Irvine, and Cow Camp, all of which are located in different areas of the US.

The Hicks Beef team.

The breed has also fit well into the Australian environment. Hicks Beef is located in a relatively temperate area of the country. While they do get hot weather and can experience drought, Andrew also mentions seeing high mountain snow on different occasions. Most of their cattle stay in the region, and in the extremely arid parts of the country further north, Bos Indicus cattle are required to endure the harsh conditions.

Focused on the Future

Hicks Beef has utilized the Simmental breed to create a sought-after seedstock operation, and following their commitment to improvement, they are constantly looking to new avenues for progress. Carcass data is becoming an increasingly important part of the program, and in the future, Hicks Beef plans to utilize data on all calves that don't make the bull pen. They are also discussing utilizing data from the commercial herd and clients.

Overall, a commitment to their customers and pursuit of tools to improve their operation has allowed Hicks Beef to find solid footing as a seedstock producer in Australia. "We're very appreciative to have been given the chance to use the figures and focus our cattle onto commercial traits." Andrew says. "We want to know accurately what our cattle are doing. To get that extra reliability with genomics, and the most up to date calculations and figures is paramount to us to get things the best for our customers." ♦

Hicks Beef is located on productive Australian grassland.

Hicks Beef's Australian Beef Composite bulls are Simmental, Gelbvieh, and Angus-cross.

Come one, come all!

All Breeds Welcome!

"Thank you to the AJSA for putting on this high-quality and educational event. I've enjoyed every minute and look forward to watching this program grow. I will totally do this again!"

- Audrey Redalen, program participant, MN

"Many thanks to the entire staff at the American Junior Simmental Association who put forth so much effort to make this opportunity possible for me and all the other young people who have been involved in this opportunity. Thank you!"

- Madeline Smith, program participant, KY

"I just wanted to start my last monthly summary by saying thank you. Thank you for having this awesome program for me to participate in my senior year of high school. I have enjoyed every minute of it, and I am excited to watch this program grow and have hundreds of participants in the upcoming year."

- Carlye Rodenbeck, program participant, TX

"Thanks to you all at AJSA! It's been a great experience! Mitchell said to me last night, 'now that my last write up is done, I'm gonna miss it!' Kudos to you all!"

- Jen Vaad, program parent, CO

"Thank you for all your hard work making this happen and working through all the kinks for us!"

- Brady Wulf, program participant, MN

"I have enjoyed the competition and learned so much over the past months."

- Ella Fischer, program participant, MO

PROFIT THROUGH SCIENCE
American Simmental Association

2020 AJSA STEER PROFITABILITY COMPETITION

The AJSA Steer Profitability Competition (SPC) is designed to provide junior members meaningful exposure to the opportunities and challenges associated with cattle feeding. The SPC will not only allow participants to measure and compare the profitability of their own animal(s), but of greater importance, it will introduce young beef enthusiasts to peers, mentors, industry advocates, and experiences that are exceedingly difficult to acquire for any beef producer. Participants in the SPC program will be powerful voices as they transition from junior membership to adult participation within the beef industry.

ANIMAL REQUIREMENTS

1. Steers only
2. Entrant must be an AJSA member
3. Animals must be entered in the ASA database
4. One parent on file in the ASA database
5. DNA sample required with entry form
6. Birth date range: 1/15/19 to 4/15/19
7. Weaning date range: 8/15/19 to 10/15/19
8. Castration must occur prior to weaning
9. Steers must weigh 500 - 750 lbs at delivery
10. Steers must be polled or dehorned
11. Any breed composition welcome provided they meet rules 1-9

CONTEST GUIDELINES

1. Entry fee of \$50/ head
2. Feedlot placement approximately November 1
3. All decisions at the discretion of feedyard
4. Harvest will occur approximately May 2020
5. Participation in monthly e-meetings
6. Entrant will receive reports on:
 - a. Monthly feed and health bill
 - b. Final feedyard data
 - c. Final carcass performance data

Winners will be announced at the 2020 National Classic Awards Banquet in Grand Island, NE. Awards will be granted for the top three animals overall, top three pen of 3 overall, and top monthly write-up participant.

CONTEST DETAILS:

- 1) All steers on GrowSafe feed intake system throughout the entire project.
- 2) Individual intake and gain information on all steers.
- 3) Monthly weights on all steers.
- 4) Steers will be fed at University of Missouri Beef Research & Teaching Farm in Columbia, MO.
- 5) A monthly newsletter highlighting SPC details, industry news and steer performance.
- 6) Monthly bill detailing specific expenses on each steer.

CONTINUED THIS YEAR

Different feedback formats
each month

- Short essay questions with prompts
- Infographic or social media post
- 1/2 to 1 page summary
- Short online quiz tailored to participant age

Animals must be entered by 9/27/2019.

Go to: juniorsimmental.org to register or find more information.

American Simmental-Simbrah FOUNDATION BREEDERS CUP GOLF TOURNAMENT

Picture Perfect. That is how you could describe the day we had for the 4th Annual American Simmental-Simbrah Foundation Breeders Cup Golf Tournament held on July 23 at the Polo Fields Golf and Country Club in Louisville, Kentucky. The weather was amazing, the golf course was beautiful and 11 teams from Wisconsin to Utah to Texas to Kentucky had many smiles throughout the day. Lori Eberspacher was there to represent the Foundation as the new Chairman of the Board to give a warm welcome and send everyone out to their starting holes on the course.

"I just can't believe how much fun everyone was having everywhere I went," said Pearl Walthall owner of Pearl's Pics as she was able to join us to capture the event on camera. "The guys were making fun of themselves, at each other light-heartedly and the enjoyment on their faces was a pleasure to see with every team that was there."

There was some pretty steep competition on the course as well amongst all of the fun as Nichlos Cryo Genetics of Jay Steenhoek, Scott Grass, Justin Johnson and Greg Van Zee took home first place for the second year in a row at 17 under par with a final score of 55. Taking home the second place finishing team was the Brew Crew of Scott Fredrick, Tyler Babbs, Ryan Long and Sherm Clark at 12 under par with a score of 60. The state of Kentucky is known for three things: bluegrass, the horse racing industry and a favorite of many, bourbon. The first and second place finishing teams were awarded all different bottles of branded bourbon that you could only purchase in the state of Kentucky sponsored by Guthridge Farms.

To add to the fun, there were individual contests set up throughout the course that allowed golfers to showcase their talents. Scott Fredrick of Illinois took home the Closest to the Pin Contest on Hole #2 and Terry Moore of Indiana was the winner of the Closest to the Pin Contest on Hole #17. The one with the greatest amount of bragging rights goes to Amanda Hilbrands of Minnesota as she tore into the Longest Drive Contest outdriving all of the gentlemen in the tournament. All were awarded gift cards back to the course Pro Shop sponsored by the American Simmental-Simbrah Foundation.

Everyone was a winner for the day as all of the participants were given a welcome bag of goodies filled with a Bluetooth speaker sponsored by Innovation AgMarketing, golf tees sponsored by Southern Jewel Cattle Company and visors sponsored by Guthridge Farms.

The American Simmental-Simbrah Foundation Breeders Cup Golf Tournament was designed to raise funds for the youth of the Simmental and Simbrah breed. The 2019 tournament rose over \$6,800 that is earmarked for the Merit Scholarship Awards and The Summit Leadership Conference. We could not have done that without the generosity of the donation from our sponsors of the tournament and cannot say THANK YOU enough for your support.

Mark your calendars for the 5th Annual American Simmental-Simbrah Foundation Breeders Cup Golf Tournament to be held in conjunction with the AJSA National Classic in Grand Island, Nebraska July 5 – 11, 2020. The Nebraska crew never disappoints in their ability to put on a remarkable event and I'm sure 2020 will be no different!

Merit Award Recipients

Gold

Kaitlin Houck, Americus, KS, is pursuing her Animal Science degree at Kansas State University, with plans to obtain an MS in Agricultural Education after graduation. She is a 13-year AJSA veteran and active member of the Kansas Junior Simmental Association. Even while away at college, Houck continues to be involved with the family ranch through managing the ranch Facebook page, attending sales to purchase new sires, becoming BQA certified, and assisting with synchronization and AI tasks. She says that AJSA contest experience has taught her to prepare for a college exam, to manage her time effectively and to adapt to unexpected change. Kaitlin is the daughter of Jeff and Lori Houck.

Gold

Cole Liggett, Dennison, OH, has been involved in the AJSA for eight years and is entering his senior year at Kansas State University in the Pre-Veterinary track. He plans to attend vet school at either Kansas State University or Ohio State University and would like to open a clinic specializing in bovine reproduction upon receiving his DVM degree. Liggett says the AJSA has given him ample opportunities to develop skills to be an ambassador for the beef cattle industry. The knowledge and skills he has gained have given him the ability to both mentor others in our industry and also effectively communicate with consumers. Cole is the son of Matt and Ruthie Liggett.

Gold

Cody Long, Creston, IA, is a 13-year active member of both the AJSA and the Iowa Junior Simmental Association. He is a senior at Iowa State University majoring in Agriculture Studies with an eye toward working in ag sales or finance, while continuing to grow his SimGenetics cow herd. Long cites learning to communicate as the most important skill he has gained from his involvement with AJSA and feels the model for Regional and National Classics prepares AJSA members to be great leaders. He encourages state associations to include junior members in events to gain knowledge and excel in real-world scenarios. Cody is the son of Rob and Gina Long.

Gold

Ethan Sylvester, Wamego, KS, is a junior at Kansas State University and has been involved in both the AJSA and the Kansas Junior Simmental Association for 13 years. He takes pride in working with younger and newer members of his state association, encouraging them to be good livestock stewards. Sylvester will graduate in fall 2020 with an Ag Technology Management degree, as well as an Associate's degree in Aircraft Metals Technology and Fabrication with future plans to commission in the Air Force as a prior service officer in the National Guard. He has career interests in animal science research or design and manufacture of agricultural equipment. Ethan is the son of Eldon and Julie Sylvester.

Gold

Bennett Walther, Centerville, IN, has been an active AJSA member for 10 years. Currently a junior at Purdue University, Walther is a founding member of the Indiana Junior Simmental Association. He credits AJSA events with building his foundational knowledge about the beef industry and giving AJSA members an outlet to learn skills that set them above their peers. He will graduate in 2021 with a degree in Agriculture Economics and Animal Science and plans to remain involved in the agriculture industry while growing his SimGenetics herd. Bennett is the son of Matt and Michelle Walther.

By Rachel Endecott Ph.D.

Sixteen outstanding junior members have been named to receive the American Simmental Association's (ASA's) prestigious Gold and Silver Merit awards. The winners were announced during the 2019 National Classic Awards banquet on July 27, 2019, in Louisville, Kentucky.

Five Gold award winners were named to receive scholarship stipends in the amount of \$3,000 each, while 11 Silver awards, worth \$2,000 each, were also awarded. The total value of the combined Merit Award scholarships is \$25,000, funded through direct support from the American Simmental-Simbrah Foundation. All awards are required to be used for post-secondary educational purposes.

Tyler Diffey, Lexington, MS, is a sophomore at Holmes Community College and will transfer after graduation to Mississippi State University to major in Animal Science. He would like to return to the family operation after college and also pursue a career in sales management. Diffey has been involved in AJSA for 10 years and states that AJSA has brought him more opportunities to work shows and sales than he would ever have imagined, which has greatly improved his marketing and networking abilities. He reminds his peers that there is always someone younger than you at an AJSA event who is looking up to you, and AJSA has shown him how to be a great role model. Tyler is the son of Dayle and Steve Diffey.

Silver

Kennedy Early, Leeton, MO, will graduate in fall 2020 from Kansas State University (KSU) with a degree in Animal Science and Industry. She plans to attend graduate school at KSU in ruminant nutrition with a goal of providing beef cattle nutrition consulting in the Midwest or perhaps operating her own feed store. During her 11 years as an AJSA and Missouri Junior Simmental Association member, Early has taken pride in exhibiting home-raised cattle at AJSA Classics as well as county, regional, and state shows in Missouri. She would like to implement workshops or a state field day for juniors in Missouri to help prepare them for Regional and National Classics. Kennedy is the daughter of Howard and Cheryl Early.

Silver

Cody Eberhardt, Wheatland, CA, is an eight-year member of the AJSA and Oregon Junior Simmental Association. His passion is to raise top-quality bulls for both the registered and commercial cattle producer, and he has sold two bulls at the Red Bluff Bull and Gelding Sale. He says that public speaking and sales talk contests have prepared him for the real world of communicating to potential buyers at bull sales. Eberhardt plans to attend the College of Southern Idaho after high school graduation, where he will pursue an Ag Business degree and culinary classes, with the long-term goal of raising SimGenetics cattle to provide beef for his own restaurant. Cody is the son of Monte and June Eberhardt.

Silver

Lauren Glick, La Prairie, IL, is a sophomore at Oklahoma State University pursuing a Pre-Veterinary degree with the goal of one day becoming a certified large animal veterinarian specializing in reproduction. She has been an active member of AJSA and the Illinois Junior Simmental Association for 10 years. Glick states that attending Regional and National Classics pushed her outside her comfort zone and taught her to take risks to achieve her goals in life. She feels that the work ethic she learned through AJSA has led to success both in and out of the show ring. Lauren is the daughter of Lane and Christy Glick.

Silver

Luke Harker, Hope, IN, has been involved with AJSA for 11 years. A junior at Hauser High School, he plans to someday run a large-scale horticulture, aquaculture, and hydroponics operation. Harker says the IGS Summit Youth Leadership Conference has been the most beneficial AJSA networking opportunity he has experienced and encourages others to attend in the future. One of his favorite AJSA moments is that his mentor at his first National Classic is now his high school agriculture teacher. He is passionate about herd health management and enjoys assisting his family in hosting the Field of Dreams sale for Simmental breeders in Indiana. Luke is the son of Daniel and Jill Harker.

Silver

Luke Herr, Arcadia, IN, is a seven-year member of AJSA and a 10-year member of the Indiana Junior Simmental Association. He will attend Taylor University this fall, majoring in Electrical Engineering and continuing his football career on the college gridiron. Herr is proud to say that he has become more outgoing during his AJSA career and has created relationships with his peers and adults that will last a lifetime. He feels that the friendships, connections, and lessons learned from his AJSA experience will serve him well now and in the future. Luke is the son of Jim and Kate Herr.

Silver

Shaylee Ison, Atlanta, IN, is a sophomore at Indiana University-Kokomo majoring in Criminal Justice with a Psychology minor, with a long-term goal of finding a job within the crime scene investigation field. She has been both an AJSA and Indiana Junior Simmental Association member for 14 years. Ison states that participating in all the contests at the AJSA Classics has not only helped her at the shows, but also at school, and that AJSA has taught her to come out of her comfort zone and never give up. She cherishes the friendships she's made during her AJSA career. Shaylee is the daughter of Scott and LaRonda Ison.

Silver

Whitney Olson, Alexandria, MN, has been involved with AJSA and the Minnesota Junior Simmental Association for six years. She recently completed her first year in the Master of Business Administration program at North Dakota State University, and also has an Agriculture Communications degree with minors in Ag Business and Strategic Communication. Her career goal is to become a manager for an agricultural firm that specializes in financing and customer service. Olson says AJSA events allow juniors to gain industry knowledge and skills as well as to network with other Simmental enthusiasts. Whitney is the daughter of Nick and Michaela Olson.

Silver

Paige Peine, Hastings, MN, is a junior at South Dakota State University majoring in Animal Science with minors in Ag Business and Ag Marketing. She is a 13-year AJSA veteran and a 10-year member of the Minnesota Simmental Association. She would like to help organize the junior members in Minnesota to set up a stand in the meat department at an urban grocery store to help answer consumer questions about the beef industry. Peine credits her AJSA involvement with becoming more outgoing and getting her out of her comfort zone, which she says has led to many new opportunities. Her career goal after graduation is to become an embryo-transfer technician. Paige is the daughter of Mike and Lori Peine.

Silver

Cara Smith has been involved in the AJSA for five years. A native of Pleasant Garden, NC, Smith lists networking at regional and national events as a major benefit of her time as an AJSA member. Meeting with peers and producers provides learning opportunities and interacting with like-minded people recharges her enthusiasm for the industry. She states that AJSA events have allowed her to gain significant confidence speaking in front of people while thinking on her feet. After she receives her Associate's degree in Science from Guilford Technical Community College in 2020, she will transfer to the University of North Carolina at Greensboro to major in Nutrition. Cara is the daughter of Craig and Elaine Smith.

Silver

Clay Sundberg, Arlington, IL, is a sophomore at LakeLand College and is a nine-year AJSA veteran. He is an active leader in the Illinois Junior Simmental Association and was recently elected president of the AJSA Board of Trustees. Sundberg cites his involvement with the mentor program at the National Classic as one of his most rewarding AJSA experiences and his inspiration for running for the AJSA Board. He takes great pride in exhibiting bred and owned females to showcase his herd's genetic progress, markets SimGenetics beef from his herd locally, and sells both bred heifers and heifer calves to other breeders and 4-H members. Clay is the son of Kenneth and Staci Sundberg. ♦

Fort Worth Stock Show and Rodeo

Show Date - February 2, 2020
817-877-2400
www.fwstockshowrodeo.com

The American Simmental Association

is proud to sanction high-quality Simmental and Percentage Simmental Progress Through Performance (PTP) shows throughout the country. The PTP program is designed to promote multi-level progress within the SimGenetics industry. PTP shows effectively combine the assessment of statistical data, such as EPDs and actual measurements, with traditional phenotype evaluation.

PTP Judges

PTP approved judges have been deemed as respectable and knowledgeable cattle evaluators by the ASA Board of Trustees Activities and Events (A&E) Committee. To be named as a PTP approved judge, an application must be sent by the applicant or on the applicant's behalf along with two letters of recommendation from current ASA members for review by the ASA Board of Trustees A&E Committee. The A&E Committee approves or denies all applicants. Each year the A&E Committee inspects the list of approved judges and makes modifications when necessary. View the PTP approved judges list at: www.simmental.org

ASA RING OF CHAMPIONS 2019-2020

Only the four major shows involved in the national show rotation are eligible for the "ASA RING OF CHAMPIONS 2019-2020".

Shows include: 2019 American Royal
2019 North American
2020 National Western
2020 Fort Worth Stock Show

Award Divisions:

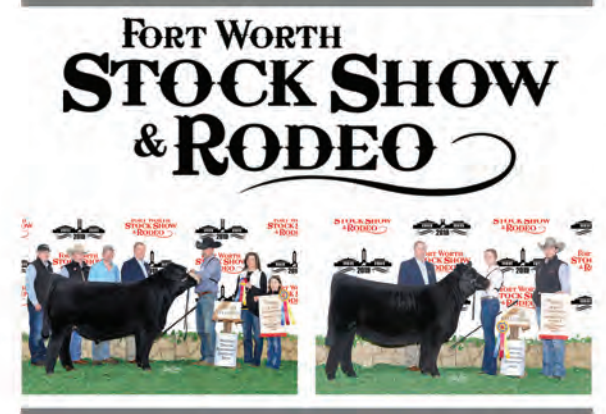

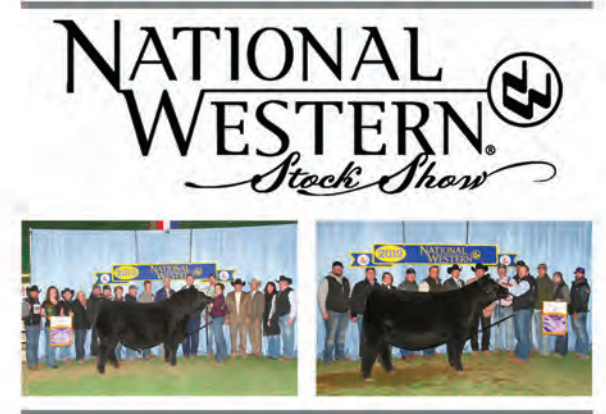

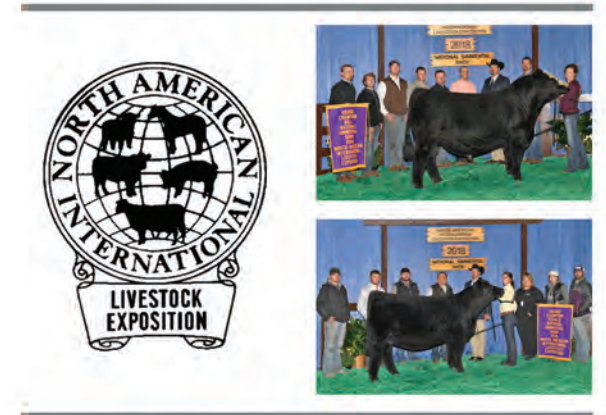

- Purebred Simmental Heifer of the Year
- Purebred Simmental Bull of the Year
- Percentage Simmental Heifer of the Year
- Percentage Simmental Bull of the Year

Qualifications:

- Exhibitor must be an active member in good standing with the American Simmental Association
- Purebred Simmental: 7/8 Simmental and up
- Percentage Simmental: at least 3/8 Simmental, but less than 7/8 Simmental
- Animals and their exhibitors must abide by the rules of the show(s) in which they participate.
- All ASA Ring of Champions award winners must at a minimum complete an ultra-low density DNA test before awards are given.

THE *EASY* WAY FOR SIMMENTAL BREEDERS TO MANAGE YOUR HERD

CattleMax brings all your records together in **one** place

American Simmental Association Compatibility

- 1. Easy to get started:** Import your ASA herd inventory, including active animals, weights, EPDs, 3-gen pedigrees.
- 2. Stay Up-to-Date:** Import updated performance data including EPDs, adjusted weights, and ultrasound data.
- 3. Save time:** Electronically register cattle using ASA's spreadsheet template based on information in your CattleMax account.

Instantly Update Key Management Data -

*Right from the Pasture, Home,
and Office*

- Herd health treatments
- Breeding, pregnancy, calving
- Weights and measurements
- Inventory and pasture movements
- Tasks list with reminders
- Calendar with notifications
- Equipment inventory and maintenance
- Income and expenses with tax organizer

CattleMax
Trusted by Simmental breeders since 1999

These two full brothers, Better Believe It and Charged Up were members of the Lee Simmental Farms 2017 Champion Denver Pen of Five.

Women of ASA

By Emme Troendle

Editor's Note: This is the ninth article in a series highlighting significant contributions of women in the Simmental industry.

The first woman to run one of the oldest and largest cattle farms east of the Mississippi River, Lynda Stuart, is one of many influential women in the Simmental industry.

Lynda Stuart

The belief that every cattleman has an obligation to produce quality beef for the world with a commitment to return more to their industry than just personal profit is the philosophy by which Lynda Stuart lives her life.

Stuart took over the management of the family commercial cattle operation, Stuart Land and Cattle Company, Rosedale, Virginia, when her late husband, Zan, passed away in 2008. Zan managed the farm himself for 58 years and was the direct descendant of William Alexander Stuart — founder of the family cattle business. The couple was the eighth generation to manage one of the largest and oldest operations east of the Mississippi River. Before she retired in 2018, Stuart left the operation with a legacy for being a science-based, educational, and conservation-focused business.

Lynda Stuart

Born and raised on a dairy farm in California, Stuart spent her childhood assisting her father, Dr. Harold Schmidt, with the office work for his dairy and artificial insemination (AI) company, Genetics, Inc. As a geneticist, her father would consult for dairy and beef operations. “My largest exposure to farm life was traveling with my father. We would go up and down the state and stay with other farm families.”

Stuart laughs, “I was kind of a sounding board for my father. He would talk to me about genetics — and I probably didn’t understand a lot of what he talked about — but as the AI company and dairy farm progressed, we became a team. I was the implementer and he was the idea man.”

In the beginning, Stuart managed the books for her father, but later handled all the promotion and advertising. Her introduction to the Simmental breed came in the late 1960s, when Travers Smith — who successfully imported the first purebred Simmental bull, Parisien, to North America — came to central California to speak at a series of educational meetings sponsored by Genetics, Inc.

Shortly after her father sold his company to Carnation Breeding Services in 1972, Signal, another imported Simmental bull, was purchased by the company and brought to the California facility. Stuart recollects organizing the press party for Signal in Vancouver, Canada, and how imported Fleckvieh-Simmental genetics were used in crossbreeding. “In the beginning, when there were so many beef breeds, everyone was juggling trying to find the right combination for crossbreeding, and my father recognized that Simmental had something special. The people who were working with the Simmental breed were also performance-directed,” she says.

The influence of her father shaped Stuart’s ranch management style. Her eye for science-based selection decisions didn’t change when she took over Stuart Land and Cattle. She continued performance testing through ASA’s Carcass Merit Program, a project Zan set in motion, and initiated a few projects of her own. Stuart says, “I implemented genomic DNA testing, I took down some old tobacco barns and fences, and improved pastures to take advantage of water systems installed with federal and state conservation projects. We had the benefit of a strong cattle market so I could do some improvements. I think my impact is greater by keeping my head down, working, and letting the results do the talking.”

Stuart is quick to point out that the agricultural industry must always be cognizant of new technology and scientific research. “My husband enjoyed being progressive and so do I. We have the luxury of being unbiased and making selection decisions based on numbers. I talk very strongly about my lofty ideal that we are producing protein for the world. We have a duty to return to the industry more than just our personal profit.”

Over her lifetime, Stuart has given back to the agriculture and beef industries through dedicating her time and energy for educational progress. She was involved with the Kellogg Foundation, served on the state 4-H board, advocated for a local high school reinstating vocational agriculture classes, and hosted educational days on the farm.

For the last 25 years, Stuart Land and Cattle has been focused on soil and water conservation by fencing off streams and developing careful drainage systems. Around 45 water tanks and five different wells were installed to provide water for the calves. Stuart shares that not all conservation projects are at the expense of the cattle producer. “Implementing wells and water tanks was very interesting because it was to our advantage to fence off the streams and get more water to areas where we had not previously had water. The cattle gained more ground to graze and we gained another 100 pounds of weaning weights. It was a win-win for us.”

As Stuart stepped into retirement in 2018, she received two awards. She was recognized as the 2018 Beef Cattle Producer by the Virginia Livestock Hall of Fame. Her portrait hangs at Virginia Tech, Blacksburg, next to her husband who posthumously received the award in 2017 — the first husband-wife team to be selected. The second award was presented by the Virginia chapter of the Nature Conservancy for “her exemplary demonstration of conservation leadership, her deep commitment of the preservation and stewardship of the Virginia lands, water, and rich agricultural heritage for the Stuart Land and Cattle Company’s longstanding partnership with the Nature Conservancy to protect some of the most biologically important forests in North America.”

“Work hard. You can never know too much,” Stuart concludes. “You can never have too many resources and extension service people. I may have had lofty goals, but I took baby steps to get there. It’s best to have a good sense of humor and the ability to laugh at yourself, your mistakes, and learn from them.” ♦

Down to the Genes

Attention Seedstock Producers! It's time to start DNA testing for spring production sales.

As producers across the country start weaning spring-born calves, ASA wants to ensure that any subsequent DNA testing on those calves is successful. With increased value being placed on genomically-enhanced EPDs, it is more important than ever to make sure producers allow adequate time for collecting and organizing samples, requesting paperwork or kits from ASA, testing at the lab, and uploading and analyzing test results. Furthermore, producers should be prepared for scenarios where samples fail or additional testing is needed. Below are the top items to consider for DNA testing this fall.

☛ **On the adjacent page, you will find ASA's DNA-testing timeline.** This takes into consideration all of the factors involved with testing. Remember, around 2% of samples will fail for a variety of reasons. Go to simmental.org, scroll down to the Down to the Genes section, and find our top tips for sample collection so you can mitigate the risk of sample failure. The ONLY way ASA can expedite the process is by sending kits to members via overnight shipping, and for members to ship samples overnight to the lab.

☛ **Genomically-enhanced EPDs are not automatic and are generated through a process separate from when ASA's DNA department uploads parentage and trait results.** From the time ASA receives results from the lab, it takes on average seven days for the animal's new data to go through the genetic evaluation. This does not guarantee genomically-enhanced EPDs. The IGS Multi-breed Genetic Evaluation analyzes the genotype data and removes genomic files with suspected errors from the genetic evaluation. For example, genotypes are removed if the international ID is incorrect or can't be linked to an animal in the evaluation, the sex isn't correct, the parent or progeny markers don't match (using 50,000 markers), two samples from the same animal have different DNA markers, the markers are out of alignment with expected proportions of heterozygous and

homozygous calls, or the laboratory had low call rates on the sample. While some of the ID problems can be fixed without a new test, other errors require a new DNA sample and test to be resolved (like samples that fail testing). Members can submit a second sample to retest but there is no guarantee the new sample will be successful. In the event a new sample is recommended for genomic testing, the member is financially responsible for the new test. This does not happen frequently but does mean members should allow adequate time for testing. Animals MUST be on file or registered to run a genomic test.

☛ **Sending samples to the lab without paperwork can double the testing time.** ASA's lab, GeneSeek, processes thousands of samples per day. If a package arrives with samples lacking either 2D barcodes or paperwork, the lab sets them aside to research, contacts ASA if they can tell the samples are Simmental, and it is left up to staff to figure out who the samples belong to, what testing they want, create an order, and communicate with the lab. When samples have the required 2D stickers or paperwork they quickly go into testing. Additionally, DO NOT send samples to ASA. Either request kits that will be sent with 2D barcodes, or if you have kits on hand, request paperwork so the samples can go straight from you to the lab. ♦

Have You Checked Out Active Herd?

A **FREE** and **EASY** cattle management software.

Keep up-to-date informal records that can be directly imported into ASA's database.

Easy access:

Import existing active animal groups or create new pasture groups and animal records.

Stay current:

Add updated performance data: actual birth, weaning, and yearling weights; calving ease scores; and import information directly into Herdbook for the most accurate EPD updates.

Save time:

Directly register cattle by moving informal pasture groups and records into an ASA job for data submission.

Save money:

Active Herd's goal is similar to other cattle management software but free with ASA membership.

Track Your Management Data:

- Herd health treatments
- Breeding, pregnancy, calving
- Weaning and yearling weights and measurements
- Inventory and active pastures

To access:

Log into herdbook.org, go to "Herd Mgmt", and select "Active Herd".

Welcome to the cutting edge

Our new GGP lineup delivers amazing power to genomically enhance your EPDs.

Today, you can plan, select and manage young seedstock with the prediction accuracy of older bulls siring several calf crops. You can save years on your herd goals – for less than it costs to fill up with gas.

We not only make DNA testing easy. We make it profitable. From fast sampling of calf DNA to quick turn-around with new products that work in powerful synergy. From time-saving conveniences to a full range of innovations designed to help you take full advantage of beef genomics.

There are exciting new ways for us to work together to attain your goals with Simmental, SimAngus™, Simbrah and SimAngus HT cattle. And we would love to be your partner as you brand your legacy in the 21st Century. To learn more, contact ASA at (406) 587-4531 or visit www.simmental.org

2019 YCC Conference

By Blake McDonald, Columbia, MO.

I was fortunate enough to attend the 2019 Young Cattlemen's Conference (YCC) on behalf of the American Simmental Association. YCC is a tour encompassing every segment of the beef industry over a 10-day period. Sixty young cattlemen and women met in Denver, Colorado, and embarked on our journey.

The first day began in the home office of the National Cattlemen's Beef Association (NCBA) where we became acquainted with NCBA staff and our fellow YCC members. We spent the morning learning about the structure of NCBA, what they are doing as an organization, and how it is beneficial to us as producers. While at the NCBA office, our lunches were prepared in-house following recipes found on the checkoff-funded website, beefitswhatsfordinner.com, and they were delicious! After lunch, we received a market outlook from the folks at CattleFax and listened to representatives from Cargill and Albertsons-Safeway, a grocery store chain, who spoke about the beef business from a retailer perspective. We finished our first day with an NCBA office tour and steak fry. On day two we got up bright and early and boarded a bus to Greeley, CO. The first stop on the trip to Greeley was a tour of the JBS packing plant. The plant was quite impressive to see. With a daily capacity of 5,500 head, the process was very fast-paced and efficient. After leaving the plant, we toured Five Rivers' Kuner Feedyard. With a one-time capacity of 100,000 head, the Kuner lot and mill were quite the operation. The sheer size and scope of both the packing facility and feed yard was something that one has to see in person to appreciate. We finished the day with a panel discussion with the JBS executive team. The JBS headquarters in Greeley is an impressive facility and was a great place to discuss some of the hot topics of the beef industry with a group of individuals that most producers wouldn't normally have access to. On our last full day in Denver, we were back at the NCBA headquarters learning about the checkoff and its benefits to us as producers. On our way to the airport, we toured a Safeway grocery store to gain a better understanding of the retail side of the beef business.

Upon our arrival to Chicago, we settled into our hotel and then had some authentic deep-dish pizza. Breakfast the next morning was provided by Hillshire Farms/Tyson at their Chicago office. Their representatives went in depth as to how they were marketing beef on a retail level and what directions they thought those markets were heading. After breakfast, we heard from Hillshire Farms and Tyson representatives about how they were marketing beef and what new avenues they were exploring to market beef. Our next stop was McDonald's Global Headquarters, quite an impressive facility! It was encouraging to see how knowledgeable and supportive the McDonald's team was of the beef industry. Topics of discussion ranged from beef procurement to menu changes to sustainability and everything in between. After presentations, we were escorted to the official test kitchen of McDonald's where we prepared our own quarter pounders made with fresh beef for lunch. We went to OSI Industries after lunch. OSI Industries is one of the world's largest makers of hamburger patties and provides a large portion of McDonald's fresh and frozen hamburger patties. We were able to take a tour of their facility where food safety and quality control was second-to-none.

Our first morning in D.C., we were greeted by NCBA staff. We covered issues that cattle producers were facing across the nation, and prepared ourselves for the next day's upcoming visits on Capitol Hill. Two fellow Missourians and I met with several of our state's representatives and senators. I had never done any lobbying before; it was an experience that I will not soon forget. Though I wouldn't want to be on Capitol Hill every day, my time there made me appreciate those that do have a presence on the Hill and keep our senators and representatives informed on our industry. As we went from office to office, it was very evident that NCBA staff has done an excellent job educating and keeping the political staff up-to-date with any and all issues affecting beef producers.

All-in-all, YCC was a great experience. I would encourage anyone who gets the opportunity to attend to do so. All of the stops over the course of the tour were educational and beneficial to anyone involved in the beef business, no matter what facet of the industry. For me, the greatest value obtained from YCC did not come from a particular tour stop or speaker, rather the network formed with my peers. Our group consisted of people from coast to coast that were involved in all sectors of the beef industry. Though we all do things a little differently, everyone shared the same objective of producing the best product that we are able to. To spend 10 days with so many future-minded, critical-thinking, progressive individuals who all had expertise in their own areas of the beef industry is an opportunity that does not come about often and I am certainly thankful to have been able to experience it. Even with our busy schedules, the YCC class of 2019 did manage to find time for some extracurricular fun. Soon after becoming acquainted with each other, we had nicknames and poked fun at one another like we had known each other for years. YCC laid the foundation for friendships that I am certain will last. It has been enjoyable keeping up with each other since the trip and learning about what each of us do on a daily basis. My sincere thanks go to Chip Kemp and the American Simmental Association for providing me the opportunity to attend YCC. After my time with 60 sharp, young minds in the beef business, I can assure you all that our industry is in good hands! ♦

The entire 2019 YCC group.

Remembering Edmund Tom

September 10, 1935 - May 9, 2019

This Texas breeder was an early advocate and devoted champion for Simbrah.

Edmund Tom, who served as chairman of the American Simmental Association Board of Trustees in 1986, passed away May 9. Edmund was raised in Campbellton, Texas, the son of Ted and Minnie Lee Tom.

After graduating from Pleasanton High School and attending Texas A&M University, Tom accepted a position with the US Department of Agriculture

as a fruit and vegetable inspector, working an area that stretched coast to coast from Southern California through the Rio Grande Valley to the southeastern states.

In 1966, he began his ranching operation, focusing on improving the land and the quality of his cattle. By 1969 he had begun his longtime relationship with Simbrah, breeding his Brahman females to Simmental bulls.

A natural leader, Tom was the first president of the newly organized Atascosa County Cattle Association. Later he was elected president of the Texas Simmental-Simbrah Association and served two three-year terms on the ASA Board.

On the local level, Tom was deeply involved in community activities including Sacred Heart Catholic Church, the Camp-

bellton Community Hall, McCoy Water Board, and nine years on the Pleasanton School Board.

Longtime friend and fellow Texan Fred Schuetze, Granbury, had these comments: "Edmund was among the earliest breeders to combine fullblood Fleckvieh with eared cattle to produce Simbrah and always insisted on using the highest quality genetics he could find.

"Conservation of his land was very important to him for the maintenance of both livestock and wildlife," Schuetze added. "He was one of a kind and he will be missed."

Another fellow Texan and Simbrah breeder, Tim Smith, Giddings, eulogized Tom "as a strong advocate of SimGenetics, who used his talents in leadership to assure a positive future for the American Simmental Association.

"He had the foresight to realize the benefits of crossbreeding *Bos indicus* and *Bos taurus* cattle and the potential that combination had for the commercial cattle industry. He was always willing to share his knowledge and very proud that his legacy would be carried on by his family," Smith said.

Later in life, Edmund and his son, J. Pat, purchased a ranch at Hebronville, where he spent his last years enjoying the peace and quiet of the ranch, combined with frequent family gatherings, including their 50th wedding anniversary.

He was preceded in death by his son, Bart Andrew; sister, Peggy White; and nephew, James Michael White.

Survivors include Margie, his wife of 53 years; son, J. Pat (Karyn); daughters, Robin Bukowski and Charlotte Tom; and four grandchildren. ♦

Low Density DNA testing through the American Simmental Association (ASA) in exchange for feed intake data.

- ASA Members will receive a \$25 rebate after low density DNA test and feed intake record on the same animal are submitted.
- Records must be valid for use in ASA's genetic evaluation.
- All breeds and composites eligible if sire is registered in ASA multibreed database.
- Applies to animals born after August 31, 2015.
- Carcass Merit Program calves do not qualify.

FROM THE HEADQUARTERS

By Rachel Endecott, Ph.D., Director of DNA Research Management and Youth Development

rendecott@simmgene.com

Recently, I scheduled an appointment for my annual eye exam. My role here at the American Simmental Association has evolved to become more computer-intensive, and I wanted to learn more about managing headaches from eye strain. After my doctor completed the exam, he smirked and said, “Let’s talk about this.”

I wasn’t sure if that was a sign of good news or bad news. Long story short, I apparently — and I quote — “over-focus” — on my screen when I’m doing computer work. Of course. Leave it to me to overachieve while reading my computer screen! So what kind of approach does one take to manage over-focusing? Blue-light glasses? Bifocals? Eye drops? Lasik surgery?

Turns out the answer is awfully straightforward — just look up. For every 20 minutes of screen time, take a break and look up, preferably as far away from you as possible. Well, now. Isn’t that simple?

It’s becoming harder and harder to just look up in the course of our busy lives, and unfortunately, it’s often bad news that forces us to take that break. Like my barely-over-30 friend who went in for an emergency C-section at 38 weeks because she’s been diagnosed with breast cancer and needs to start intensive chemotherapy as soon as possible. Or knowing that the recent shooting in El Paso, Texas, happened in a shopping center I frequented regularly when I was in graduate school in nearby Las Cruces, New Mexico.

On the other hand, sometimes the reason for just looking up and taking that break is joyful: a gathering of old friends who haven’t seen each other in a few years at a Montana Stockgrowers Association summer meeting followed by the ranch rodeo in Miles City, or the wedding of two of my former students that feels like a slightly dysfunctional, yet hilarious and entertaining family reunion.

During some seasons in life, it feels like the only thing we can do is just keep our heads down and put one foot in front of the other. Everyone is going to have those tough seasons. Let’s try to just look up one time and check on each other. It could make all the difference in the world. That’s my challenge to you. **Just. Look. Up.** ♦

ALERT: Unpaid Annual Service Fee

If you have not paid your Annual Service Fee (ASF) by October 23, 2019, the Association will remove the billing from your account, and your membership will become inactive.

If a membership wishes to become active later in the same fiscal year, a reinstatement fee will apply. The total ASF fee consists of the regular fee plus a \$50 reinstatement fee.

Adult	\$110	}	Plus Reinstatement Fee \$50
Junior	\$40

BULLETINS

Six Trustees Positions Open

A total of six Trustee positions are open in four regions as follows:

Eastern (two seats): Randy Moody, AL (eligible for re-election).

Gordon Hodges (not eligible for re-election, but will serve an additional year; past chairman)

North Central (two seats): Steve Eichacker, SD (eligible for re-election)

South Central (one seat): Dr. Gary Updyke, OK (eligible for re-election)

Western (one seat): Tom Nelson, MT (eligible for re-election)

ASA Rules and Bylaws provide that if a Trustee serves as Chairman of the Board during the final year of the second term, that Trustee will be able to serve an additional year as a voting member of the Board. Thus, Gordon Hodges, as outgoing Chairman, qualifies to serve an additional year on the Board.

Election Timetable

- Sept. 20** Write-in Ballots for Trustee nominations mailed and posted online.
- Oct. 18** Deadline for write-in ballots to reach Chairman of the Tellers.
- Nov. 19** Trustee election ballots mailed and posted online.
- Dec. 17** Deadline for Trustee ballots to reach Chairman of the Tellers
Call to Meeting mailed and posted online, including ballots for any Rules or Bylaw changes.
- Jan. 7** Deadline for Rule/Bylaw change ballots to reach Chairman of the Tellers.
- Jan. 18** 52nd Annual Meeting

2020 NWSS Schedule Announced

7:00 pm	Foundation Gala
Monday, January 20	
8:00 am	Female Pen Shows
2:00 pm	The One Sale XXVII
Tuesday, January 21	
8:00 am	YouthShows Open Class Bull Shows
Wednesday, January 22	
8:00 am	Open Class Female Shows

DoubleTree Is Denver Headquarters

Once again, the DoubleTree Hotel Denver, 3203 Quebec Street, will serve as headquarters for the ASA Annual Meeting, Foundation Auction, and ASA Board Meetings. A special Stock Show rate of \$120 is available to ASA members; to reserve your rooms, call 303-321-3333 and ask for the "SimGenetics 2020" block. Reservations must be made no later than November 1, 2019, after that date, the quoted flat rate will no longer be available.

Transportation to the DoubleTree is by train to the Central Park Station and then shuttle service to the hotel. Once you arrive at Central Park Station, contact the hotel (303.321.3333) and request shuttle service to the hotel. The DoubleTree provides transportation to and from the NWSS grounds.

SimmApp Available Now

Sign-up to receive push notifications and get immediate announcements tailored to your needs. SimmApp can be found on Google Play, Apple Store, or Amazon apps.

Genetic Conditions Panel

The Genetic Conditions Panel includes seven genetic defects tracked by the American Simmental Association. These defects are: AM, NH, CA, DD, OS, PHA, and TH.

The Genetic Conditions Panel is available with GGP-LD or GGP-HD testing, and the add-on price for the panel is \$25. If a member orders any one of the genetic conditions on the panel with a GGP-LD or GGP-HD test, the entire panel will automatically be tested. If the animal is not undergoing a GGP-LD or GGP-HD test, the price is \$25 per defect tested. If requesting the genetic conditions panel after a GGP-LD or GGP-HD test is complete, the testing will be billed at single defect rates, which is \$25 per defect. ♦

By Dr. Fred Swain, Chairman of the Eastern Junior Funding Auction

The Eastern Simmental Junior funding committee initiated a scholarship actively designated to be for an Eastern Junior member for 2019. The initial scholarship discussion was for one scholarship in this initial year; however, as some additional donations were made, it was decided to award two scholarships this year.

There were seven very qualified applications which were reviewed, each of which was very high quality, but a decision had to be made. The interview committee chose Emily Ivey and Olivia Branum.

We are looking forward to continuing this scholarship function in 2020 and encourage this year's applicants who were not chosen to reapply as well as other interested juniors in the Eastern Region. ♦

Left to right: Emily Ivey, Dr. Fred Swain, and Olivia Branum.

CONNECTION

Developing leaders through friendship, networking, and communication skills!

By Clay Sundberg, AJSA President

The week may have gone by as fast as the Kentucky Derby, but the memories made at the 2019 AJSA National Classic will be remembered for a lifetime. I would like to start off by thanking Drew and Holli Hatmaker along with the entire Simmental Breeders Sweepstakes crew for hosting such a prestigious event in Louisville, Kentucky. I also would like to recognize the North Dakota, West Virginia, Oklahoma, and

Utah State Associations for hosting their region's AJSA Regional Classics. The time and dedication put in by all who helped with a Classic this year by volunteering or donating allowed us to display the quality of both our cattle and our AJSA members.

The National Classic week started with an exciting opening ceremony which only set the pace for the week to come. From the educational contests, to the dance, to the show ring, AJSA members could be found showing their competitive drive to learn and compete, while just as importantly laughing and enjoying time

with other members from across the country. We had a great turnout for our Mentor program and the Regional meetings.

With that, I am truly honored to serve as the 2019-2020 AJSA President. I can't wait to get to know as many AJSA members as I can and work with them in any way possible. Along with that, I am extremely excited to work with this year's AJSA Board of Trustees. Although those who hung up their jackets in Louisville will be missed, they have passed down their jackets to an awesome group of newly elected trustees who are ambitious and ready to dive in head first to work alongside our current trustees. It is our goal to keep improving the AJSA for its members. With that, I want our membership to know that we are in this position to represent our AJSA members, so please reach out to any of us with questions or concerns you have throughout the year to make the AJSA the best it can possibly be.

I wish you all the best of luck throughout the next year and hope to see you at one of the PTP shows this fall along with the other trustees who will be in attendance. I hope to see you all at the 2020 AJSA National Classic as the bases are loaded and it's sure to be a Grand Slam in Grand Island, Nebraska! ♦

BEEF BUSINESS

ERS, NIFA Will Relocate to Kansas City

US Secretary of Agriculture Sonny Perdue has announced that USDA will relocate the Economic Research Service (ERS) and the National Institute of Food and Agriculture (NIFA) to the Kansas City region.

In addition, USDA said it would not move forward with a plan announced last August to realign ERS under the Office of the Chief Economist. The cost analysis for the ERS and NIFA relocations projected savings of nearly \$300 million over a 15-year lease term.

Cattle Care Audit Launched

Food Safety Net Service Certification and Audit (FSNS C&A) has launched the FSNS C&A Temple Grandin Responsible Cattle Care Program. The program was developed under the guidance of animal care expert Dr. Temple Grandin. Suppliers volunteer to participate in this approach to improving conditions under which cattle are managed.

This system focuses on objective scoring at meat harvesting facilities for indicators of responsible care and management of animals intended for human consumption.

Checkoff Reform Bill Reintroduced

US Senators have reintroduced a bill that would limit and make more transparent the use of federal checkoff dollars. Senators Cory Booker (D-NJ) and Mike Lee (R-Utah) reintroduced the legislation. The same bill, previously co-sponsored by Senators Rand Paul (R-KY) and Elizabeth Warren (D-MA), was excluded from the Farm Bill during 2018.

The senators say contractors are misusing checkoff funds, in some cases, by using fees their constituents pay in to the program to lobby for legislation that might work against their interests.

FDA Backs 'Best if Used By' Dates

FDA is urging the food industry to adopt the phrase "best if used by" for packaged food date labels to reduce consumer confusion and food waste. The agency said confusion over date labeling accounts for about 20% of consumer food waste. USDA's Economic Research Service pegs food waste at the retail and consumer level at 30%, meaning 133 billion pounds of food worth \$161 billion are thrown out each year.

FDA Bolsters Animal Biotech Oversight

The US Food and Drug Administration (FDA) is hiring more scientists to evaluate development of animal biotechnology, over objections from livestock groups like the National Pork Producers Council (NPPC) that are clamoring for USDA jurisdiction over gene-edited animals.

In Memoriam . . .

Former MSA President Passes

• **Warren Nelson, 65**, Wibaux, Montana, a partner in Nelson Livestock Company, passed away on July 12. A graduate of Wibaux High School, he continued his education at Bismarck Junior College, earned a two-year degree in agriculture and was a member of the football team. Heavily involved in agricultural organizations, he served as president of the Montana Simmental Association and was a member of the Farm Bureau and the Montana Stockgrowers. He is survived by his brothers, Charles (Gloria) and Tom (Renee).

Warren Nelson

Foundation Honor Roll

Double RD Farm

The ASA Foundation thanks all of the generous supporters over the past year.

BEEF BUSINESS

(Continued from page 112)

FDA announced the agency's push at the Food and Drug Law Institute's annual conference in Washington DC. NPPC has criticized FDA's management of the technology, saying its regulatory red tape is slowing the pace of its development at the risk of US agriculture's competitiveness in the global market.

USDA Sued Over School Lunch Rules

Two lawsuits have been filed against USDA over its decision to relax some rules on nutritional guidelines in the National School Lunch Program that were put in place during the Obama administration.

The rule, announced last December, relaxes some requirements on milk, whole grains, and sodium in response to challenges schools have faced serving meals that both appeal to students and meet nutritional standards.

USDA Refutes Challenge

USDA has objected and denied allegations made in a lawsuit seeking to stop an agency policy plaintiffs say exempts medium-sized concentrated animal feeding operations from standard government oversight.

Filed late last year in federal district court in Washington DC by Food & Water Watch, the Animal Legal Defense Fund, and several other groups, the lawsuit had been delayed by the federal government shutdown. USDA filed its response to the complaint.

Restaurants See Growth From Millennials

Millennials with children are proving to be a growth segment for the nation's restaurants, especially considering that the entire foodservice industry experienced flat traffic growth in 2018.

A report found that millennial parents increased their restaurant visits by 5% in 2018 compared to 2017, especially at quick service restaurants. Millennials with kids made 7.3 billion quick service restaurant visits last year.

'Natural' Claim Draws Buyers

The "natural" claim on food labels is more likely than other messages to prompt consumers to buy a product, according to a new survey. The survey of 1,000 US adults looked at which loosely-regulated marketing claims on packaging had the most influence on consumer purchasing behavior.

A close second claim to the "natural" claim for motivating consumer purchases was the claim "no preservatives." In the survey, 53% of shoppers said that the natural claim would inspire them to buy, and 51% said no preservatives.

Packers Face Lawsuit Over Pricing

The nation's largest beef processors — targets of a lawsuit alleging antitrust violations in paying US ranchers unlawfully depressed cattle prices — are now the target of a class-action lawsuit accusing the companies of fixing pricing that consumers pay for beef products.

The lawsuit filed in the US District Court of Minnesota accuses Tyson Foods, JBS SA, Cargill, and National Beef Packing of conspiring to charge consumers artificially inflated prices for beef products since 2015. The suit alleges that the companies — which process 80% of the nation's beef products — artificially limited the amount of cattle they purchased, sparking higher retail prices and illegally boosting their profits over the last four years.

Beef Industry Adopts Sustainability

Industry stakeholders have signed on to a plan meant to strengthen the sustainability of US beef through continuous improvement in production, processing, and selling practices.

The US Beef Industry Sustainability Framework is a product of the US Roundtable for Sustainable Beef (USRSB), a multi-stakeholder organization aligning major food and retail companies, cattle producers, veterinarians, scientists, and non-governmental organizations in an effort to better beef industry sustainability and transparency. ♦

NOTHING TO LOSE, EXCEPT PARASITES.

Cydectin® (moxidectin) Pour-On: Trusted treatment shown to increase weight gain.¹⁻³

Cydectin Pour-On provides control of 33 parasite species and stages. This broad-spectrum control helps reduce pasture contamination and has been shown to increase weight gain in multiple studies¹⁻³ versus untreated cattle. Cydectin Pour-On **helps protect cattle from reinfection** against key parasites, including 28-day control of the brown stomach worm (*Ostertagia ostertagi*), even after cattle have been turned out for grazing.

Visit your retailer or BayerLivestock.com to learn more.

Keep Cydectin out of reach of children.

CYDECTIN®
(moxidectin) Pour-On

CUTTING EDGE

Link Between Red Meat, Lower MS Risk

Australian researchers have found there may be a connection between the consumption of unprocessed red meat as part of a regular diet and a lower risk of having a condition that can lead to multiple sclerosis (MS).

Scientists studied subjects who showed signs of central nervous system demyelination which other research says leads to full-blown MS 83% of the time 10 years after diagnosis. The team discovered that subjects who ate more unprocessed red meat than the group that ate much less were between 37% and 52% less likely to be at risk for MS.

Researchers Uncover Alternative Decontamination

Caprylic acid, a fatty acid found in milk and coconut oil that has antibacterial, antiviral, and antifungal properties, has come out on top in a comparison of four frequently used *E. coli* intervention treatments on beef products, according to a new study.

It has been found to be an effective and viable alternative to conventional interventions frequently used for meat product decontamination. Researchers reported that caprylic acid was the most effective treatment, following by lactic acid and peroxyacetic acid.

Cross-border Bison Meat Recalled

Quebec-based Northfork Bison Distributions has voluntarily recalled an undisclosed amount of bison burgers and ground bison products from the marketplace due to possible *E. coli* O121 and O103 contamination.

The recalled products consisted of ground bison and ground bison patties. According to the company, the products were distributed to institution and retail outlets across the eastern and central US.

Pig Ear Dog Treats Sicken People

In connection with a 33-state outbreak of *Salmonella* illness, the Centers for Disease Control and Prevention (CDC) and the Food and Drug Administration (FDA) have advised not to buy or feed dogs any pig ear dog treats, including any already in homes. The treats could be contaminated with *Salmonella*, and handling the treats could make people sick; eating the treats could make dogs sick. So far, 127 ill people have been reported, including 26 people who have been hospitalized. No deaths have been reported.

Product testing has identified many different strains of *Salmonella* in pig ears from various brands and suppliers. Information collected to date about where ill people bought pig ears has not identified a single supplier, distributor, or common brand of pig ear treats. ♦

beef@internationalgeneticsolutions.com

If Beef is Your Business

The American Simmental Association Carcass Merit Program (CMP) is the beef industry's most demanding and informative young sire test. The program is a hallmark of ASA breed improvement for economically relevant carcass traits. Commercial producers play an integral part in this project.

American Simmental Association

To learn more about the CMP visit www.simmental.org, then click Carcass Merit Program under the Commercial tab.

Questions, contact lgieess@simmgene.com for more information regarding this program.

Participants receive:

- ◆ \$60 for each AI-sired calf with carcass information
- ◆ Free semen on top young herd sires
- ◆ Free ASA Genetic Evaluation on your cowherd
- ◆ Free genotyping on terminal progeny
- ◆ Keep any or all replacement females

Become a Carcass Merit Program test herd today

**The CMP is a structured young sire progeny test. Participating cooperator herds will random sample their cowherd with CMP semen, and the resulting male (or female) progeny will be harvested with individual carcass data gathered. ASA Staff will work with cooperator herds to provide bulls that fit the general criteria of your management program, however only bulls nominated into the CMP program may be used. Producers are encouraged to be somewhat proficient in Microsoft excel for accurate and consistent record keeping.*

CORPORATE REPORT

Tyson Adds Plant-Based Proteins

Tyson Foods, Inc., has announced its first plant-based meat alternative product, additional meat and plant blended products, and a new brand, Raised & Rooted, for its retail line. The initial products under the new Raised & Rooted brand include plant-based nuggets, set to debut in late summer through national retailers, and blended burgers, set to roll out in the fall, which Tyson bills as healthier than competing plant-based-only patties.

In addition, Tyson's existing Aidells brand has launched Aidells Whole Blends sausage and meatballs, made with chicken and plant-based ingredients, the release said.

IKEA Develops 'Meat'balls

Swedish furniture giant IKEA, known for serving Swedish meatballs in its store restaurants, said it is developing a plant-based version to do its part in helping produce the "70% more food that will be needed by 2050 to feed the world's growing population."

IKEA's announcement came as plant-based meat products maker Beyond Meat announced an initial public offering which saw shares of that company skyrocket by 163% on Wall Street and its value reach \$3.8 billion.

FDA Warns JBS

The US Food and Drug Administration has issued a warning to JBS USA urging the company to take corrective actions at a Pennsylvania rendering facility to stop the continued production and sale of beef tallow that is contaminated with pentobarbital.

The letter comes after multiple FDA investigations at the JBS Souderton plant, finding that the facility's operators failed to identify and exclude raw materials and ingredients containing pentobarbital.

Walmart Takes Convenience to New Level

Walmart is preparing to launch a new grocery delivery service that will bring grocery products directly from the store to the refrigerator. The chain's new InHome Delivery service offers delivery to consumer homes by specially trained associates at a time most convenient for the customer.

The Walmart associates gain one-time access to a home or garage through a smart device and they wear cameras that allow homeowners to view the delivery in real time through the internet.

Smithfield Signs Pact with Wind Power Provider

Smithfield Inc. has reached an agreement with a company that will provide electricity generated on its wind site that could generate a total of 300 megawatts of electricity when it becomes operational in 2020.

Smithfield is expected to buy 75 megawatts of renewable energy for 12 years from ALLETE Clean Energy, which is building the wind site in Oklahoma. The carbon-free electricity represents more than 15% of Smithfield's overall energy use.

Amazon to Cease Restaurant Delivery

Amazon is shutting down its restaurant delivery service. The service was tested in 2015 in Seattle before expanding to about two dozen cities.

The service had failed to gain traction against competitors that include DoorDash, Grubhub, and Uber Eats. Amazon continues to deliver groceries to Prime members through AmazonFresh and from its Whole Foods supermarket chain.

INTERNATIONAL

China Stops All Canadian Meat Imports

China has asked Canada to stop issuing meat export certificates to the country after an investigation into ractopamine findings in a batch of Canadian pork products turned up counterfeit veterinary health certificates, the Chinese embassy said in a statement. The embassy said 188 forged certificates have been discovered. The certificates were sent to Chinese regulatory authorities through Canada's official notification channel, the online statement said.

China announced earlier it would block pork imports from a third Canadian processor after inspectors discovered the banned additive ractopamine in a shipment and promised to inspect all Canadian meat sent to China. Canada's minister of agriculture said the Royal Canadian Mounted Police had been called in to investigate the origins of the shipment that arrived in China with a fake Canadian export certificate because it is a criminal case.

China Stipulates Compliance with Rules

Chinese officials recently hosted representatives from 30 exporting countries, telling them to make sure they get their business in order before sending meat products to China. The highly unusual meeting follows problems that prompted China to suspend all meat imports from Canada.

The top issue discussed was ractopamine, which China prohibits. Ractopamine, a beta-agonist, is a feed additive approved by the US Food and Drug Administration used to enhance lean muscle gain, increase growth rate, and increase feed efficiency.

Canada Addresses Labor Shortage

The Canadian government has launched a three-year immigration pilot program aimed at addressing labor shortages, particularly in meat processing and mushroom production.

The initiative aims to attract and retain workers by providing them with an opportunity to become permanent residents. A maximum of 2,750 principal applicants, plus family members, will be accepted for processing in any given year. This represents about 16,500 new permanent residents in the three-year duration of the program. Temporary foreign workers will be able to apply under the pilot in early 2020.

USTR Hopes for Japan Deal Soon

US Trade Representative Robert Lighthizer told the House Ways and Means Committee in a recent hearing that he hopes the US and Japan are close to a deal on agriculture tariff cuts.

Resolving the differences over ag tariffs are key to striking a bilateral trade agreement with Japan. The US and Japan had additional trade discussions during the June Group of 20 summit meeting in Osaka. ♦

The ASA Customer Service Team is here to help you.

Important Dates in October

Save money by marking your calendars!

2020 Spring Total Herd Enrollment begins

2020 Spring Total Herd Enrollment opens October 15, 2019, and will close December 15, 2019. This enrollment is for herds that are calving between January 1 - June 30, 2020. Add this reminder to your calendar to enroll October 15, 2019! Enroll early for early rates.

Pay your Annual Service Fee by October 23, 2019.

There is a reinstatement fee after October 23 for adult members wishing to become active in the same fiscal year. After October 23, 2019, the total fee will be \$160 (annual service fee of \$110 and reinstatement fee of \$50). The reinstatement fee does not apply to junior memberships.

If you have questions, please contact the Association at 406-587-4531 or members@simmgene.com.

MENU MORSELS

Chinese Beef and Broccoli

Ingredients:

- 1 pound flank steak sliced into ¼-inch thick strips
- 3 cups small broccoli florets
- ½ cup beef stock
- 5 cloves garlic minced
- 2 tablespoons cornstarch
- 1 tablespoon canola oil

For the sauce:

- ½ cup low sodium soy sauce
- ¼ cup brown sugar
- 2 teaspoons cornstarch

Instructions:

1. Toss sliced beef in a large bowl with cornstarch.
2. Heat canola oil in a pan over medium heat for a few minutes. Add sliced beef and cook until it browns, a few minutes, stirring frequently. Transfer to a plate and set aside.

3. Add broccoli and garlic to the pan, and stir. Add beef broth. Let simmer until the broccoli is tender, about 10 minutes, stirring occasionally.
4. While waiting for the broccoli to cook, combine all of the sauce ingredients in a bowl and mix well.
5. Add the reserved beef and sauce to the pan, and stir. Let simmer for 5 minutes so the sauce thickens a bit.
6. Serve beef and broccoli over cooked white rice. ♦

Dr. Gordon Jones leading pasture walks the previous day showcasing Red Hill females and management.

Bart and Ty Jones conducting the sale.

COW SENSE

Listed below are ten questions designed to test your knowledge of the beef industry.

Elite: 9-10 correct; **Superior:** 7-8; **Excellent:** 5-6; **Fair:** 3-4; **Poor:** 1-2.

1. What is the approximate normal rectal temperature of cattle?
2. How are hormone carried in the body?
3. Name the two most desirable quality grades of beef.
4. What is the highest valued cut on a beef carcass?
5. What is the scientific name for the American Bison?
6. If two purebreds of different breeds are crossed, what is the term used to describe their offspring?
7. Define dystocia.
8. Which of the cow's stomach is known as the “hardware compartment?”
9. In what part of the body should growth-stimulating implants be placed?
10. What is the term given to the breaking down of feedstuffs in the body of an animal?

Answers:

1. 101.5; 2. By the blood stream; 3. Prime & Choice; 4. Tendloin; 5. Bos bison; 6. F1; 7. Calving difficulty; 8. Reticulum; 9. Under the skin of the ear; 10. Digestion

SAFETY ZONE™

CALF CATCHERS

A Cowman's Best Friend at Calving Time!

Designed for Processing Safety...

- Enables quick and safe calf catching!
- Convenient, step in access of producer!
- Holder secures calf for easy processing!
- User-friendly inside release of calf to cow!
- Move calves easier with cow following!
- Less cow stress, mother can see and smell calf!
- Reduces danger while working new calves!
- Quick Mount/Dismount on both ATV & UTVs!

Now available with a digital scale!

Bob Seely, WY – "This product has been invaluable. It makes the job of doctoring and tagging calves significantly safer. I am grateful for the Calf Catcher for making the process easier!"

Gary Reimer, OK – "Never has tagging a calf been easier or safer. Momma cows are not near as nervous when they can smell their calves and you are safe."

Michael Dixon, KY – "Our Calf Catcher worked as advertised. It was extremely helpful in this year's calving season."

Neal Otto, OK – "A lot safer to work calves with protective mommas. It seems like they are a lot more at ease when they can see what is going on. They just patiently wait."

Extended-Release Injectable Parasiticide
5% Sterile Solution
NADA 141-327, Approved by FDA for subcutaneous injection
For the Treatment and Control of Internal and External
Parasites of Cattle on Pasture with Persistent Effectiveness.

CAUTION: Federal law restricts this drug to use by or on the order of a licensed veterinarian.

INDICATIONS FOR USE

LONGRANGE, when administered at the recommended dose volume of 1 mL per 110 lb (50 kg) body weight, is effective in the treatment and control of 20 species and stages of internal and external parasites of cattle:

Gastrointestinal Roundworms	Lungworms
<i>Bunostomum phlebotomum</i> – Adults and L ₁	<i>Dictyoaulus viviparus</i> – Adults
<i>Cooperia oncophora</i> – Adults and L ₁	
<i>Cooperia punctata</i> – Adults and L ₁	
<i>Cooperia surnabada</i> – Adults and L ₁	
<i>Haemonchus placei</i> – Adults	Grubs
<i>Oesophagostomum radiatum</i> – Adults	<i>Hypoderma bovis</i>
<i>Ostertagia lyrata</i> – Adults	
<i>Ostertagia ostertagi</i> – Adults, L ₁ , and inhibited L ₁	
<i>Trichostrongylus axei</i> – Adults and L ₁	Mites
<i>Trichostrongylus colubriformis</i> – Adults	<i>Sarcoptes scabiei</i> var. <i>bovis</i>

Parasites	Durations of Persistent Effectiveness
Gastrointestinal Roundworms	
<i>Bunostomum phlebotomum</i>	150 days
<i>Cooperia oncophora</i>	100 days
<i>Cooperia punctata</i>	100 days
<i>Haemonchus placei</i>	120 days
<i>Oesophagostomum radiatum</i>	120 days
<i>Ostertagia lyrata</i>	120 days
<i>Ostertagia ostertagi</i>	120 days
<i>Trichostrongylus axei</i>	100 days
Lungworms	
<i>Dictyoaulus viviparus</i>	150 days

DOSAGE AND ADMINISTRATION

LONGRANGE® (epinomectin) should be given only by subcutaneous injection in front of the shoulder at the recommended dosage level of 1 mg epinomectin per kg body weight (1 mL per 110 lb body weight).

WARNINGS AND PRECAUTIONS

Withdrawal Periods and Residue Warnings

Animals intended for human consumption must not be slaughtered within 48 days of the last treatment. This drug product is not approved for use in female dairy cattle 20 months of age or older, including dry dairy cows. Use in these cattle may cause drug residues in milk and/or in calves born to these cows. A withdrawal period has not been established for pre-ruminating calves. Do not use in calves to be processed for veal.

Animal Safety Warnings and Precautions

The product is likely to cause tissue damage at the site of injection, including possible granulomas and necrosis. These reactions have disappeared without treatment. Local tissue reaction may result in trim loss of edible tissue at slaughter. Observe cattle for injection site reactions. If injection site reactions are suspected, consult your veterinarian. This product is not for intravenous or intramuscular use. Protect product from light. LONGRANGE® (epinomectin) has been developed specifically for use in cattle only. This product should not be used in other animal species.

When to Treat Cattle with Grubs

LONGRANGE effectively controls all stages of cattle grubs. However, proper timing of treatment is important. For the most effective results, cattle should be treated as soon as possible after the end of the heel fly (warble fly) season.

Environmental Hazards

Not for use in cattle managed in feedlots or under intensive rotational grazing because the environmental impact has not been evaluated for these scenarios.

Other Warnings: Underdosing and/or subtherapeutic concentrations of extended-release anthelmintic products may encourage the development of parasite resistance. It is recommended that parasite resistance be monitored following the use of any anthelmintic with the use of a fecal egg count reduction test program.

TARGET ANIMAL SAFETY

Clinical studies have demonstrated the wide margin of safety of LONGRANGE® (epinomectin). Overdosing at 3 to 5 times the recommended dose resulted in a statistically significant reduction in average weight gain when compared to the group tested at label dose. Treatment-related lesions observed in most cattle administered the product included swelling, hyperemia, or necrosis in the subcutaneous tissue of the skin. The administration of LONGRANGE at 3 times the recommended therapeutic dose had no adverse reproductive effects on beef cows at all stages of breeding or pregnancy or on their calves. Not for use in bulls, as reproductive safety testing has not been conducted in males intended for breeding or actively breeding. Not for use in calves less than 3 months of age, because safety testing has not been conducted in calves less than 3 months of age.

STORAGE

Store at 77° F (25° C) with excursions between 59° and 86° F (15° and 30° C). Protect from light. Made in Canada.

Manufactured for Merial, Inc., Duluth, GA, USA.

©The Cattle Head Logo and ©LONGRANGE are registered trademarks of Merial, Inc. ©2015 Merial, Inc. All rights reserved. 1050-2889-06, Rev. 2/2015, 8LDN016C

Here, TIME IS MEASURED IN GENERATIONS.

That's Why You Need LongRange® (eprinomectin) For Up To 150 Days Of Parasite Control.¹

Bloodlines. You're as proud of yours as you are of theirs. But if you used a short-term dewormer like Cydectin® (moxidectin) or Dectomax® (doramectin), you may not have been doing your genetics justice. That's because your cows and heifers were probably reinfected with parasites just halfway through the grazing season – right when they need to gain weight to breed back and give milk.

Only LONGRANGE delivers true season-long control.¹

25.4 lbs.

LONGRANGE heifers gained 25.4 lbs. more on average over those treated with DECTOMAX.²

Out here, there is no time for shortcuts. This year, think LONGRANGE.

theLONGRANGElook.com

Caution: Federal law restricts this drug to use by or on the order of a licensed veterinarian.
Warnings and Precautions: For use in cattle only, not for use in humans or other animal species. Keep out of reach of children. Not for use in breeding bulls, or in calves less than 3 months of age. Not for use in cattle managed in feedlots or under intensive rotational grazing. Not for use in female dairy cattle 20 months of age or older, including dry dairy cows, or in veal calves. Post injection site damage (e.g., granulomas, necrosis) can occur; these reactions have disappeared without treatment. Not for intravenous or intramuscular use. Do not underdose. Do not treat within 48 days of slaughter.

Available in 500 mL, 250 mL and 100 mL bottles. Administer subcutaneously at 1 mL/110 lbs.

¹Dependent upon parasite species, as referenced in FOI summary and LONGRANGE product label.

²Results based on actual on-farm comparative demonstration. Individual herd results may vary. Data on file at Boehringer-Ingelheim.

Consult with your veterinarian to discuss expectations for your operation.

May/June '20	April 1	April 8	April 19	May 8
September '20	August 3	August 10	August 17	Sept 4

Send all ad materials to: register@simmgene.com or Fax: 406-587-8853

A non-refundable fee of \$50.00 will be assessed if a client does not meet deadlines or if the client commits to advertising and cancels after the deadline or if the ad must be dropped to ensure on time publication.

Advertising materials (including photos) must be in *the Register* office by the dates listed above. *the Register*, which mails by periodicals rate, assumes no responsibility for actual receipt date.

Design Charges

Advertising rates are for camera-ready ads only. Additional design charges will apply to any ad that is designed by ASA Publication, Inc.

Layouts & Proofs

Every effort will be made to provide proofs on all ads — if all ad material arrive in *the Register* office prior to the deadline and a correct email address or fax number is provided.

Terms

All accounts are due and payable when invoiced. Interest charges of 1.5 percent per month (18 percent APR) will be added to accounts 30 days past due. If an account becomes 60 days delinquent, all ASA Publication, Inc. work may be suspended until full payment is made. After review by the ASA Executive Committee, ASA privileges may be denied to those with accounts over 90 days delinquent.

Advertising Content

the Register and its staff assume no responsibility or obligation to verify the accuracy and truthfulness of advertising copy submitted to *the Register*. However, *the Register* reserves the right to reject any advertising copy or photo which *the Register* deems unsuitable for publication for any reason, including copy or photographs which are false or misleading. *the Register* assumes no responsibility for the accuracy and truthfulness of submitted print ready ads. Advertisers shall indemnify and hold harmless *the Register* for any claims concerning advertising content as submitted. Advertising containing pedigrees or statements regarding performance must conform to records kept by the American Simmental Association. Copy deviating from official records may be changed as necessary without advertiser consent.

Editorial Policy

Opinions expressed are the writers' and not necessarily those of *the Register*. Photographs are welcome, but no responsibility is assumed for material while in transit or while in the office.
